I. Letter to Shareholders

Dear Shareholders,

We thank you for your support to Brogent Technologies (hereafter "Brogent") and for attending our annual 2018 shareholders' meeting amidst your busy schedule.

In 2017, Brogent's revenue amounted to NT\$1,514 million. The gross profit was NT\$725 million. The operating profit was NT\$340 million. The net income was NT\$271 million, the earnings per share reached NT\$6.00. The total amount of new contract signed in 2017 broke our company's record again. There was an 8.5% growth on the total amount of new contracts in 2017. In addition to construction contracts, film production and service and maintenance revenue made significant improvement over the year.

In 2017, there were three flying theaters opening in Europe, i.e. German, Spain and Netherland. Among them, Europa Park had an outstanding record by its over 2 million visitors within only 6 months. In addition, the i-Ride "Voletarium" of Europa Park has awarded Europe's Best New Ride, which further established the leading status of Brogent's brand in the high-end theme park market. As for the Asian market, we expect that Chinese theme parks will head for a high-value direction in the near future; Brogent had several sales contracts signed with premium Chinese franchise companies. Starting this year, our revenue will benefit from the mid-to-low end market; though the revenue from high-end market will grow steadily, the profit from the mid-to-low end one will surge significantly. The equipment maintenance cycle of the mid-to-low end market is relatively short; therefore, we look forward to seeing that the service and maintenance revenue becomes our next profit driver which cannot be underestimated. The Company continues to expand its scale of operations and diversification; in the foreseeable future, the operation of Brogent will be driven by three aspects, i.e. the high-end market, the mid-to-low end market and film and equipment maintenance.

For years, the Company continues to engage in advanced technological R&D and innovative applications, and implement product-centric design and research as well as

systematic management to maintain the leading position of products and technologies. Our new product Q-Ride launched in IAAPA Attractions Expo in Orlando, Florida, U.S.A. Q-Ride combines AR and VR technology; with a VR gaggle, Q-Ride can extend the experience of premium theme parks to the undeveloped and unsatisfied markets. The current market looks high on this new product; we are confident to win more new contracts through it!

As Brogent expands its operation globally and the profit grows steadily, we have initiated the construction of Taiwan's theme park industry supply chain. Last October, we held our "i-Ride Experience Center" grand opening ceremony in our Kaohsiung headquarters; the center has earned positive reviews. The "i-Ride Experience Center" has run by its subsidiary "Brogent Global Inc." for the operation execution and been supported by Brogent for the integration of software and hardware. We expect to connect Taiwan's premium manufacturers through this "store-front-and-factory-back" business model, in order to present sophisticated craftworks of Taiwan to the world. Looking ahead, the Company and all of its employees will continue to achieve the Company's various operating goals in gratitude of each and every shareholder's long-term support and encouragement.

Our best wishes for the health and prosperity of all our shareholders!

Chairman, Chung-Ming Huang

1. Accomplishments in 2017

(1) Business Plan Implementation Outcomes in 2017

Unit: NT\$1,000

Item \ Year	2016	2017	Change (amount)	% Change
Sales revenue	881,670	1,514,469	632,799	71.77
Gross profit	444,937	725,335	280,398	63.02
Operating expenses	336,429	384,601	48,172	14.32
Operating income	108,508	340,734	232,226	214.02
Net income (loss) before tax	129,584	327,563	197,979	152.78
Net income(loss)	106,112	271,181	165,069	155.56

(2) 2017 Budget Execution

According to the Regulations Governing the Publication of Financial Forecasts of Public Companies, the Company did not need to compile a financial forecast for 2017, and therefore this section is not disclosed.

(3) Analysis of Financial Gains and Losses and Profitability

Unit: NT1,000

Item \ Year	2016	2017	
Financial structure (%)	Debt-to-assets ratio	19.56	19.26
	Long-term fund to property, plant and equipment (fixed assets) ratio	370.76	332.31
Solvency (%)	Current ratio	728.64	703.72
	Quick ratio	537.88	451.84
	Times interest earned	2615.71	5351.09
Profitability	Return on assets (%)	3.45	8.17
	Return on equity (%)	4.08	9.95
	Paid-in capital to income before tax (%)	29.00	73.32
	Net profit margin (%)	12.04	17.91
	Earnings per share (NT\$)	2.30	6.0

(4) Research and Development

To continuously enhance the Company's competitiveness, the Company has always actively invested in R&D efforts. In 2016 and 2017, it has expended a total of NT\$95.569 million and NT\$129.949 million in R&D, respectively accounting for 10.84% and 8.58% of the net operating income. 2017 R&D expense was lowered mainly because the development of new projects was included in the cost of good sold.

(5) Impacts of External Competitive Environment, Regulatory Environment, and Overall Operation Environment

The Company operates its business in accordance with domestic and foreign laws and regulations and periodically notes any changes in domestic and foreign policies and development trends, to facilitate immediate response. The Company's employees also receive training regularly to update them on current political and economic changes and trends; therefore, changes to laws and regulations will not exert a material impact on the Company's business development.

Regarding external competition and the overall business environment, because the Company has successfully expanded into overseas markets in 2016, we will continue to develop our businesses based on market internationalization. By seeking high-quality customers, attaining product recognition, raising product sales prices, and adopting a product composite marketing model concurrent with mature technologies and scaled production, the Company expects to accurately ascertain the pulse of the global market. Thus, based on the economic recovery of European and American countries as well as China's entertainment market demand, Brogent will expand its businesses into the global market, thereby enhancing its overall revenue performance.

2. Summary of Business Plan for 2018

(1) 2018 Operational Goals and Crucial Product Marketing Policies

1. Continue to optimize the quality of sensory simulation amusement park facilities and diversify product category.
2. Actively extend into the international market and raise its global brand

awareness.

3. Deepen the design and production of digital contents and heighten product added value.
4. Engage in industry–academic cooperation to actively cultivate high-quality specialists in digital content.

(2) Expected Sales Volume and Criteria

The Company's operational revenues mainly come from the sales of motion simulation entertainment facilities. According to the Regulations Governing the Publication of Financial Forecasts of Public Companies, the Company did not need to compile a financial forecast for 2016, and therefore this section is not disclosed.

3. Future Corporate Development Strategy

- (1) Product diversification: We will continue to extend our product line from the current 15 product types.
- (2) Market internationalization: The North America and European markets are growing rapidly, with the Chinese market will become the largest single market.
- (3) Diversification of revenue models: In addition to the outright selling of our equipment, profit distribution, ventures, peripheral products, themed IP, and content licensing will also be our stable source of income.
- (4) Integration of strategic partner resources: Licensing of themed IPs will be strengthened, and more business locations will be established.

II. Company Profile

1. Date of Establishment

October 30, 2001.

2. Company History

Company milestones up to the date of this report:

4. Manager name and distribution situation regarding employee bonus in the last year (2016):

	Title	Name	Stock bonus	Cash bonus	Total	Total amount as a percentage of earnings (%)
Managerial officer	President	Chih-Hung Ouyang	0	1,718	1,718	1.70
	Director of Technology Center	Teng-Hung Lai				
	Chief Engineer & Director of Project Center	Yi-Chung Huang				
	Chief Financial Officer	Sui-Chuan Lin				
	Senior Manager of Audit Office	Hui-Ping Li				

Note: As of the printing date of this Annual Report, the distribution list of employee profit sharing has not been fixed, and shall be proposed as stipulated according to the actual distribution of last year.

(4) Respectively compare and describe the analysis of remunerations to Directors, Supervisors, President and Vice Presidents as a percentage of earnings in the last two years and description of the policy, standards and packages of remunerations, procedure for making such decision and relation to business performance and future risks:

Unit: NT\$1,000

Title	2017		2016	
	Brogent	All companies in consolidated statements	Brogent	All companies in consolidated statements
Director	13,720	17,579	9,668	13,339
Supervisor				
President				

Note : The Company did not set up a Vice President position.

The total amount as a percentage of earnings (losses) in 2017 and 2016 were respectively 6.48% and 12.57%. The Company determines the aforementioned personnel remunerations according to the Company's business performance, management performance, and standards in the market. The paid remuneration also conforms to the Company's salary-related management regulations and should be adequate for assuming responsibilities and risks.

4. Implementation of corporate governance

(1) Operations of the Board of Directors

In 2017, a total of 9 (A) meetings of the Board of Directors were held in the most recent year. The attendance was as follows:

Title	Name (Note 1)	Attendance in person (B)	By proxy	Attendance rate (%) [B/A] (Note 2)	Note
Chairman	Chung-Ming Huang	9	0	100.00	Reelected on 2017.05.31
Director	Chih-Hung Ouyang	9	0	100.00	Reelected on 2017.05.31
Director	Chin-Huo Huang	9	0	100.00	Reelected on 2017.05.31
Director	Changchun Investment Co. Ltd. Representative: Chih-Chuan Chen	9	0	100.00	Reelected on 2017.05.31
Director	Chun-Hao Cheng	9	0	100.00	Reelected on 2017.05.31
Independent Director	Yi-Hsiang Huang	4	0	100.00	Removed on 2017.05.31
Independent Director	Chin-Wen Chuang	5	0	100.00	Elected on 2017.05.31
Independent Director	Shun-Jen Cheng	7	0	77.78	Reelected on 2017.05.31

Other matters that require reporting:

- Matters stipulated in Article 14-3 of the Securities and Exchange Act and resolutions adopted by the Board of Directors, to which an Independent Director has a dissenting or qualified opinion that is on record or stated in a written statement, shall describe the date of the board meeting, term of the board, agenda items, opinions of Independent Directors, and actions taken by the company in response to the opinion of the Independent Directors: None.

Title	Name (Note 1)	Attendance in person (B)	By proxy	Attendance rate (%) [B/A] (Note 2)	Note
2.	Regarding Directors who recuse themselves from discussion or voting on an agenda item in which they have an interest, their names, agenda items, reason for recusal, and voting on an agenda item shall be stated: Please refer to the Opinions from all the directors in the record of Board of Directors' Meetings.				
3.	<p>An evaluation of the goals set for strengthening the functions of the Board (e.g., setting up an auditing committee and enhancing information transparency) and implementation status during the current and immediately preceding fiscal years.</p> <p>(1) The operation of the Board of the Company complies with laws and regulations, the Articles of Incorporation, and the Exercise of Powers of the resolutions in shareholders' meetings. All Directors adhere to the principle of good faith and duty of care in addition to possessing the expertise, skills, and literacy required for exercising their powers, in order to maximize benefits for all of their shareholders.</p> <p>(2) To establish a favorable governing system for the Company's Board of Directors, a sound supervision function, and strengthened management mechanism, the Company formulated the Board of Director Meeting Agenda Regulations in accordance with Article 26-3 of the Securities and Exchange Act, including agenda items, execution of operations, matters that should be recorded in meeting minutes, announcements, and other matters that should be adhered to, and the aforementioned shall be handled in accordance with the formulated regulations.</p> <p>(3) In addition to regularly conducting self-examination of the operation of the Board of Directors and reinforcing the functions of the Board, the Company requires its internal auditors to produce auditing reports that describe the Board operations in order to conform with government regulations.</p> <p>(4) Establish a Remuneration Committee to assist the Board of Directors in executing its duties.</p>				

Note 1: Directors and Supervisors who are also legal persons shall disclose the name of corporate shareholders and their representatives.

Note 2:

- (1) For Directors or Supervisors who resigned from their position prior to the end of the financial year, the date of their resignation shall be noted in the Note column. Their actual attendance rate (%) shall be calculated according to the frequency they attended meetings of the Board during their tenure and their attendance in person.
- (2) For changes to Directors or Supervisors before the end of the financial year, the new and old Directors or Supervisors shall be listed and Directors or Supervisors who are old or new and the date of their reelection and changes shall be noted in the Note column. Their actual attendance rate (%) shall be calculated according to the frequency they attended meetings of the Board during their tenure and their attendance in person.

(2) State of operations of the audit committee or attendance of Supervisors in board meetings: The Company does not have an audit committee set up. Attendance of Supervisors in board meetings:

In 2016, a total of 8 (A) meetings of the Board of Directors were held in the most

recent year. The Supervisor attendance was as follows:

Title	Name	Attendance in person (B)	Attendance rate (%) (B/A) (Note)	Note
Supervisor	Chun-Nan Chen	4	100.00	Removed on 2017.05.31
Supervisor	Yung-Liang Huang	9	100.00	Reelected on 2017.05.31
Supervisor	Yi-Hsiang Huang	5	100.00	Elected on 2017.05.31
Supervisor	Ken-Huang Lin	5	100.00	Elected on 2017.05.31

1. Composition and responsibility of Supervisors:

(1) Communication between Supervisors and Company's employees and shareholders: Supervisors communicate with employees and shareholders through the company spokesperson. This communication channel has been effective in past years, thereby facilitating supervisory functions.

(2) Communication between Supervisors and the Company's internal Audit Manager and CPA (e.g., items, methods, and outcomes of communicating company financial status and business conditions): The Company invites its Supervisors to attend board meetings; therefore, the Company reports the financial statement and business conditions of the Company during the board meetings or designates the Audit Manager to report the evaluation results of internal audits. All Supervisors may express their opinions during the meetings. Moreover, the financial statements approved by the CPA are submitted to the Supervisors for approval. If Supervisors voice their opinion when reviewing the financial statements, such opinion shall be either first explained by the CPA or be communicated to the CPA.

2. If a Supervisor voices an opinion in the Board of Directors meeting, the date of the board meeting, term of the board, agenda items, resolutions adopted by the board, and actions taken by the company in response to the opinion of the Supervisor shall be described: None.

Note:

* For Independent Directors who resigned from their position prior to the end of the financial year, the date of their resignation shall be noted in the Note column. Their actual attendance rate (%) shall be calculated according to the frequency they attended meetings of the Board during their tenure and their attendance in person.

* For changes to Independent Directors before the end of the financial year, the new and old Independent Directors shall be listed and Independent Directors who are old or new and the date of their reelection and changes shall be noted in the Note column. Their actual attendance rate (%) shall be calculated according to the frequency they attended meetings of the audit committee during their tenure and their attendance in person.

Note 1: The 2017 proposal of surplus distribution has not been resolved in the shareholders' meeting.

Note 2: Earnings not yet calculated.

(6) Dividend policy and implementation status

1. Dividend policy

When allocating the net profits for each fiscal year, the Company shall first offset its losses in previous years and set aside a legal capital reserve at 10% of the profits left over, until the legal capital reserve has equaled the total capital of the Company; the remaining balance and unappropriated earnings for the year shall be adjusted. Then, set aside special capital reserve in accordance with relevant laws or regulations or as requested by the authorities in charge and to satisfy business needs of the Company. And the Board shall propose a distribution plan for any balance remaining, and such balance shall be distributed in accordance with the resolution of the shareholders' meeting.

The Company is situated in a changing industrial environment, wherein the company life cycle is at a stable growth stage. Considering the Company's capital requirement for continuous expansion and business operations, as well as long-term financial planning to satisfy shareholders' needs for cash flow, the Company's dividend policy was based on the residual dividend policy in the relevant laws and regulations of the Company Act. The future capital requirement is measured according to the future capital budget plan of the Company; then, set aside the capital required for earnings financing, and the remaining earnings shall be distributed by way of cash or stock dividend. Particularly, cash dividend may not exceed 10% of the total dividend.

2. Dividend distribution to be proposed to the shareholders' meeting:

The Company's 2017 earnings distribution plan was approved by the Board on March 12, 2018. Shareholders' meeting has not yet been held. The 2017 earnings distribution plan is as follows:

	Amount (NT\$1,000)	Dividends per share (NT\$)
Cash dividend	197,976	4
Shares dividend	88,488	2

(7) Effect of the proposed stock dividends (to be adopted by the Shareholders' Meeting) on the operating performance and earnings per share:

The Company did not release financial forecasts in 2017 and hence it is not

applicable.

(8) Employee bonus and remuneration to Directors and Supervisors

1. Dividend Policy for terms stated in the Articles of Incorporation regarding employees' bonus and Directors' and Supervisors' remuneration:

The Company shall pay dividends or bonuses when there is profit. Any unappropriated earnings may be distributed as employee bonus in the sum of 5% to 15%. The Director and Supervisor remuneration may not exceed 2%. If there are accumulated losses of the company, the earnings should be reserved in advance to make up the amount. Employee bonus shall be paid by stock or cash; nevertheless, the criteria of qualified employee should be determined by the Board of Directors.

2. Basis for estimating the amount of employee bonuses and remuneration to Directors/Supervisors, basis for calculating the number of shares to be distributed as stock bonuses, and the accounting treatment of the discrepancy, if any, between the actual distributed amount and the estimated amount, for the current period:

The Company estimates employee bonus and remunerations to Directors and Supervisors according to the annual net profit, legal capital reserve, and the value specified in the Article of Incorporation. The estimated values shall be recognized as the expense for the current period. If thereafter, the actual distribution differs from the estimated values in the resolution of shareholders' meeting, then it shall be regarded as loss for the next year and shall not influence the ratified financial report.

The Company was approved by the Board of Directors' meeting on March 12, 2018. The distributed employee bonus was NT\$28,115,000 and Director and Supervisor remuneration was NT\$5,9070,000.

3. Earnings distribution proposal has passed the Board of Directors but not the resolution of the shareholders' meeting:

The Company's 2017 earnings distribution was approved by the Board of Directors' meeting on March 12, 2018. A cash dividend of NT\$4.0 per share and a stock dividend of NT\$2.0 per share is proposed, the total cash dividend to be distributed is NT\$176,975,908 and total stock dividend amount is NT\$88,487,950.

4. Earnings distribution proposal passed in the resolution of the shareholders' meeting:

Not applicable. The Company's 2017 earnings distribution plan was approved by the Board of Directors' meeting on March 12, 2018. Shareholders' meeting has not yet been held.

5. Describe, where applicable, the reason and handling approach for the difference (including the number of shares, the monetary amount, and the face value of shares distributed) between the actual distribution of employee bonus and remunerations to Directors and Supervisors and the approved employee bonus and remunerations to Directors and Supervisors:

Not applicable.

These values did not differ from the recognized expense and the annual estimated amount.

(9) Buyback of Treasury Stock:

March 31, 2018

Treasury stocks: Batch Order	1st Batch
Purpose of buy-back	Transfer to employees

V. Business Overview

I. Business Activities

(1) Business Scope

1. Company's primary business activity

Information software retailer	Electronic material retailer	Computer installation
Information software wholesaler	Electronic material wholesaler	Information software service
Information processing service	Electronic information supply service	Arts service
General advertising service	Sound publishing	Arts performance activity
Automated control equipment engineering	Machinery installation	Wholesale of cultural education, musical instrument, and educational entertainment necessities
Machinery wholesaler	Computer and business machinery wholesaler	Retailer of cultural education, musical instrument, and educational entertainment necessities
Electronic retailer	Computer and business machinery retailer	International trade
Intellectual property	Product design	Landscape and interior design
Machinery retailer	Other machinery retailer	Except for approved business activities, may engage in activities that are not prohibited or restricted by law

2. Company's primary products and their operating weight

Unit: NT\$1,000

Product Category	2016		2017	
	Net revenue	Operating weight	Net revenue	Operating weight
Simulator rides	818,109	92.79	1,436,045	94.82
Mobile device software	-	-	-	-
Others (Note)	63,561	7.21	78,424	5.18
Net revenue	881,670	100.00	1,514,469	100.00

Note: Others primarily refer to income from repair, maintenance, and labor affairs.

3. The Company's products

Simulator Rides are the Company's main product. Since moving to the Kaohsiung Software Park in 2013, the Company has gradually placed its business focus on the media-based attraction (MBA) industry, meaning that we combined our previously developed 3D real-time imaging and audiovisual multimedia technologies with the Stewart six-axis motion platform and dynamic simulation techniques. Subsequently, the Company successfully completed the FlyOver Canada project in Vancouver, becoming the leader of the flying theater industry. The Company's operating model has extended from selling hardware to digital content development in recent years. Since October 2013, we cooperate with Japan's Kodansha in integrating Kodansha's comic characters into our simulator ride products. The first result is the 4D animation ride film around Attack on Titan. In 2014, Kodansha licensed its IP to us, enabling the Company to sell the 4D product to its customers. Starting from 2015, the Company has changed its management model, from once-off selling of simulator rides to managing it with its customers. Moreover, the Company is working with customers in planning and developing relevant peripheral products, thereby expanding the sources of income.

In December 2015, The grand opening of i-Ride flying theater themed “Attack on Titan” was held in Shang-Shun World, Toufen Township, Miaoli County, Taiwan.

In addition to providing fun experiences, Brogent's product development team proceeds to put more stringent requirements to improve quality and security. Our flying theaters have been formally adopted by the United States UL certification and the TUV SOUTH. The 4D motion cinema in the Netherlands, which can carry 100 people, also passed the European TUV NORD safety certification. An introduction to our products :

Product name	Description	Images
<p>i-Ride</p>	<p>The i-Ride, featuring a suspended seat platform, is the only dynamic flying theater on the market built on a six degrees of freedom (6DOF) motion platform. It not only delivers super realism and fantastic entertainment effects, but is also the most representative device among all extant indoor gaming devices.</p> <p>Riders' feet hang freely, to deliver the true sensation of flying through the air. The sweeping bird's eye perspective delivers unobstructed realism with no blind spots. Wind, sound, light, water, and aromas heighten the sensation of conquering the air.</p>	
<p>d-Ride</p>	<ol style="list-style-type: none"> 1) Unlimited story topics 2) Trackless or track bound and noiseless design for self-driving cars 3) Flexible plan scenes according to actual needs onsite 4) Combined with interactive game design, with touch, shoot, and hand gesture control operating methods 	
<p>v-Ride 360</p>	<ol style="list-style-type: none"> 1) The 360° massive cylinder screen delivers heightened realism and an unobstructed panoramic view with no blind spots 2) Passengers can walk safely and freely, selecting their favorite perspective 3) Suitable for various themes; with special 4D effects, users can immerse into the video content 	

Product name	Description	Images
<p>v-Ride basic</p>	<p>The modern version of the classic 4D cinema. The electrical motion base together with a wide range of special effects delivers a great experience.</p> <p>1) High G-Force: Uses large-scale motion platform that creates effects that simulate high g-forces</p> <p>2) 16:9 screen suitable for a diversity of video topics; with special 4D effects, a realistic experience is created</p>	
<p>t-Ride</p>	<p>The most advanced immersive tunnel experience in the market with a vehicle that can move with six degrees of freedom.</p> <p>1) Two-sided curved screen design, increasing visual sense of realism and excitement</p> <p>2) Vehicle can be changed depending on the theme, such as traveling on the same car, and with special 4D effects, it's as if you're there in person</p>	
<p>GestureMagic</p>	<p>The next step in advanced interactivity: Gesture based 3D experience that let's guests fight virtual monsters.</p>	

Product name	Description	Images
<p>Q-Ride</p>	<p>Brogent’s product for the compact indoor market and a breakthrough for the VR market. The first product from Brogent that uses VR glasses instead of a traditional screen. It comes with preinstalled ride content, simulating an underwater experience and a tour around the world.</p>	

4. The Company's new future products (services)

Furthermore, in response to the prevalence of online shopping activities, the convenience of mobile devices, and the fact that people cannot visit large theme parks in remote areas whenever they desire, the Company has endeavored to build a CitiPark indoor experience center in the city, where transport is convenient. Using the Company's innovative imagination, we combined simulator ride technologies with a variety of images, music, apparatuses, special effects, and themes, enabling visitors to travel through space and time. Thus, with this innovation, the benefits of edutainment in learning geography and astronomy and experiencing foreign cultures can be achieved. CitiPark is based on the operating model of Disneyland; however, unlike Disneyland and Universal Studios Japan, which are located in a suburban areas, CitiPark will be established in an area easily accessible to tourists, who can then imagine themselves as a story character whenever, wherever they desire, thus creating an experience economy that is just around the corner. The first CitiPark opened in Miaoli of Taiwan .

Regarding the development of simulator rides, in addition to continuing investing in the R&D and product optimization based on existing hardware designs, the Company also endeavors to add different product lines in response to global customer demand, customizing products that are suitable for various types of customers.

In 2017, the company has launched the compact simulator Q-Ride during the IAE trade show in Orlando and has received very positive reviews by the international industry press.

(2) Industry overview

1. Industry's current trends and future outlook

Since moving to the Kaohsiung Software Park in 2013, the Company has gradually placed its business focus on the media-based attraction (MBA) industry. The following section presents an overview of the new media entertainment industries:

In the early days, theme parks were mainly equipped with mechanical and simple electronic facilities such as the Ferris wheel, bumper cars, carousels, and roller coasters. However, as new technologies emerged, consumers gradually started to entertain themselves by engaging in experience-based consumption activities. Thus, these facilities can no longer attract consumers, leading to the gradual decline of the once thriving theme parks. In place of such theme parks is the simulator ride equipment that combines digital contents and fantasies well-known to adolescents. Moreover, simulator ride equipment is not only entertaining but also educational. This trend of the experience economy is increasing in the Asian market.

According to the 2015 global tourist attraction report published by the authoritative Theme Entertainment Association (TEA), the global theme park industry has showed steady growth in 2015. Particularly, the number of visitors to top 10 theme parks worldwide grew by 7.2% in from 2014 to 15, and the growth rate for the top 25 theme parks was 5.4%. The growth in the number of visitors from Asian regions was the most significant, at 7.5%. In the Middle East regions, construction for large-scale theme parks has commenced such as the Warner Bros in Abu Dhabi, which is scheduled to open in 2018. The overall growth rate for Europe remained steady, but United Kingdom, Germany, and Denmark all exhibited stronger growth.

Current Asian theme parks are experiencing the same bottleneck. For example, China's theme park exhibited overly high ratio of entrance fees to total revenue (80%) and low tourist revisit rate (20%). To effectively solve the aforementioned problems, new amusement parks must focus on product structures and customer services. While theme parks in Taiwan and China had committed to raising their entrance price to increase their income, theme parks in non-Asian countries such as the European and American regions have developed peripheral products, lowering the proportion of entrance fee income to 50%.

The further expansion of Disney through acquisition of Marvel earlier and Fox in 2017 has underlined the importance of intellectual property for the industry. In collaboration with Kodansha, Brogent was able to display the characters and storyline of the Attack on Titan IP

through its simulator ride devices. Concurrently, the Company develops fine cultural and creative products, which can be promoted through tourists' word of mouth after then experienced. Thus, the popularity of these products can be increased, thereby elevating the total amount of spending per capita.

Asia has shown strong growth in recent years and neighboring countries in South East Asia are following with with projects like Chimelong Ocean Kingdom in China that become Asia's biggest domestic operated theme park in it's first year of operation. Similar projects by local investors opened or will open in Vietnam and Indonesia and large investments are flowing into Japan to gear the local attractions up for the 2020 Olympic games.

2. Relationship between up-, mid-, and down-stream suppliers in the industry's supply chain

Upstream industry	Midstream industry	Downstream industry
Hardware: 1.Precision machinery industry 2.Spherical screen 3.Projector Software: 1.Wireless embedded control system 2.Spherical projector and playback control system 3.High-definition digital content	Integrated hardware and software technologies	Global theme parks Exhibition Shopping mall Tourist attractions Urban experience center

The upstream industries associated with the simulator ride equipment comprise the hardware section, including precision machinery industry and manufacturers of spherical screens and projectors, and the software section, including wireless embedded control system, spherical projector and playback control systems, and digital contents. The Company designs and integrates various software and hardware technologies according to customer needs, and then sells the products to downstream industries such as theme parks, museums, shopping mall, and urban experience centers.

3. Product development trends

Previous theme parks: Mainly equipped with mechanical and simple electronic facilities such as the Ferris wheel, bumper cars, carousels, and roller coasters. Generally, in bad weather, these theme parks must cease their operation, substantially impacting business operations. By comparison, multimedia simulator

ride facilities can be installed indoors free from environmental influences; thus, the usage rate of theme park equipment can be enhanced, increasing the economic benefits of theme parks. Europa-Park in Germany was able to increase its annual attendance from 5.5 to 5.6 million visitors especially in the winter months of its 2017 season thanks to the opening of the Brogent delivered “Voletarium” attraction. Moreover, simulator ride facilities have become the options for updating theme parks in European and American countries and for planning and constructing theme parks in emerging countries. In recent years, under the influence of mature digital video technologies and Hollywood films, traditional mechanical amusement facilities are no longer effective for attracting new-generation tourists. To satisfy tourists' entertainment needs and novelty, new amusement parks have successively incorporated digital video technologies with electromechanical equipment. Thus, tourists can not only enjoy the excitement of conventional outdoor facilities, but also experience indoor facilities with excellent sound and lighting effects without being influenced by weather conditions. Furthermore, the Company's simulator rides that stimulate both sensory experiences and thrilling sensations, which are in line with the current trend of experience economy.

4. Product competition

Simulator rides are a type of amusement facilities featuring sound, lighting, and realistic effects that are developed to satisfy the entertainment needs of consumers. Consumers are given the options of playing on either mechanical facilities (e.g., roller coaster, free fall, and pirate ships) or static activities such as watching a film. However, the mechanical amusement facilities provide relatively monotonous entertainment effects, involve high construction cost, pose safety concerns, and are limited to certain age groups. In addition, the operation of these facilities is easily affected by weather conditions. Watching a film is a type of leisure static activity, providing only visual entertainment effects and thus failing to satisfy the needs for sound and light sensory stimulations pursued among the younger generations. Therefore, such amusement facilities cannot yield satisfactory entertainment effects or enhance the parks' benefits. An overview of the current domestic market reveals that the Company has no competitors involved in similar business operations. Thus, there are no alternative or competing products on the market.

(3) Overview of Technology and R&D

1. R&D investments in recent years to the date of the annual report

Unit: NT\$1,000

Year	2017	2018Q1
R&D expenses	129,949	-

2. Successfully developed technologies and products in recent years

Year	R&D Accomplishments
2011	Novel modularized suspension spherical theater based on a vertical six-axis actuating platform Ski simulator Tablet 3D man-machine interface (Android 3.2) 9s series software downloading tool (Android platform) Commercial electronic games – The Legend of a Golden City
2012	Novel special drive method Web-shaped seat design mold Seat cover design and production Actuator cantilever turning gate Suspension two-axis actuator platform stress analysis Smart TV man-machine interface (Android 2.3) Tablet 3D man-machine interface (Android 4.0) 9s series software downloading tool (iOS platform)
2013	Smart TV software Electrical gas six-axis platform design Suspension two-axis actuator platform design and production Completely dark ride (d-Ride) design Balloon Ride design
2014	Media Free Fall Design Interactive walking theater Joey's Aquarium (sketch-type aquarium) Track d-Ride system
2015	“Attack on Titan” i-Ride Film Car Racing simulator ride
2016	Q-Ride i-FUN HUB
2017	m-Ride

(4) Business plan - long-term and short-term

1. Short-term development plan

(1) Marketing and product plan

- A. Commit to on-going projects because successful performance is the best marketing tool for a company; strengthen digital content development capacity to satisfy future market demands for videos.
- B. Design and plan highly modularized projects, provide affordable modularized system, and improve competitive advantage.
- C. regulate outsourced vendors' production operation so that the products meet international standards; and continue to design products conforming to international environmental regulations to become a benchmark of green enterprises. Our flying theater is already EN and ASTM certified.
- D. Sales channels are relatively closed; considering the ecological layout of local markets of various regions, the Company will adopt a cooperative model in which it forms a strategic alliance with its agents.
- E. Participate in international exhibitions (e.g., IAAPA), keep increasing the visibility of the company's product, and expand the range of regional buyers.

(2) R&D plan

- A. Apply the ability to integrate six-axis actuator platform with multimedia technologies, optimize d-Ride and innovative Media Free Fall Ride to expand the Company's product line, and satisfy customers' diversified needs.
- B. Reinforce knowledge management and integrate existing data, so that technological resources can be shared to enhance technological capacities.

(3) Human resources and informatization plan

- A. Strengthen training programs and enhance the quality of R&D personnel so that employees can improve as the company develops.
- B. Effectively integrate company's internal resources to enhance work effectiveness.

(4) Financial Plan

- A. Use appropriate financial instruments and formulate contract-based sales plan to avoid risk of currency fluctuations.
- B. Strengthen project management and reduce receivables to increase the turnover rate of receivables.

2. Mid- and Long-term development plan

(1) Marketing and product plan

- A. Target the future demand market of Asian regions where economic growth is high and then advance toward the global market, thereby becoming internationally recognized primary supplier of simulator rides.
- B. Seize business opportunities in replacing, renewing, or adding construction projects in the future European and US markets and jointly work with strategic alliance partners in market expansion.

(2) R&D plan

- A. Cooperate with domestic research institutes and academic units to acquire leading technologies.
- B. Continue to develop new technologies and acquire patents.

(3) Human resources and informatization plan

- A. Strengthen training to enhance employee skills.
- B. Recruit professional managers to improve business performance.
- C. Purchase professional collaborative operating software to provide employees around the world with a joint operating platform.

(4) Financial Plan

- A. Use various fund-sourcing channels to create optimal financial structures that maximize company value.
- B. Issue financial instruments in a timely manner for the company to acquire minimum capital cost.
- C. Properly use financial instruments to reduce currency risks.

II. Market, production and sales

(1) Market analysis

1. Product sales region

Unit: NT\$1,000

Year		2016		2017	
Sales Region		Net revenue	%	Net revenue	%
Domestic sales	Taiwan	107,566	12.20	25,815	1.71
	Asia	389,411	44.17	1,209,646	79.87
Exports	Americas	28,357	3.21	152,023	10.04
	Europe	356,336	40.42	115,568	7.63
	Australia	-	-	11,417	0.75
Subtotal		774,101	87.80	1,488,654	98.29
Total		881,670	100.00	1,514,469	100.00

2. Market Share

An overview of the current domestic market reveals that the Company has no competitors; therefore, no information regarding market shares is currently available for comparison. Regarding simulator rides in new media amusement industries, the Company is the first to integrate precision machinery, spherical projectors, audiovisual control, and wireless embedded system and became the company the independently developed simulator ride technologies. In 2017 four flying theaters opened in Europe, three of which are delivered by Brogent. We have once again confirmed our strong position as global market leader in the flying theater market.

Internationally, in addition to Disney in the United States possessing three similar theaters that are expensive and not available for third party purchase, Dynamic Attractions in Canada and Huss and Simtec from Germany both have also introduced simulator rides. However, these three companies only adopt motion platform-based hardware technologies and are not equipped with the ability to integrate hardware and software technologies, rendering them incapable of offering a comprehensive solution regarding simulator rides to business operators. Furthermore, apart from the Simtec solution, their platform moves merely in a maximum of two axial directions, yielding poor realistic effects. Therefore, after the Company entered the simulator ride market, the Company will leverage its advantages (technology and costs), cooperate with Vekoma Rides Manufacturing BV, and introduce simulator rides to theme parks and tourist attractions around the world. Thus, tourists worldwide can perceive the enjoyment generated from riding the simulator rides, and

the Company's business scale can be enhanced.

3. Future market demand and supply and growth potential

The Company implemented the Content–Channel (CC) Strategy in recent years, transforming from being merely a supplier of amusement facilities to an operator of entertainment businesses. To achieve this goal, the Company recruited strategic investors over the past year, while adopting diversified management strategies that integrate profit distribution models to replace the model where devices are just sold once. CitiPark has become the Company's business demonstration site where a profit distribution business model has been adopted. Taiwan's first standalone i-Ride is now in operation at the Experience Center at Brogent's headquarter in Kaohsiung, providing Taiwanese citizens with diverse sensory experiences. In addition to outright selling its equipment, Brogent has not only delivered technology but also creatively planned an experience center exhibit, in the hopes of educating children through fun, thereby bringing parents and children closer together. In fact that people cannot visit large theme parks in remote areas whenever they desire, the Company has endeavored to build the experience center in the city where transport is convenient. The goal was to make fun more accessible.

Regarding the Company's main product—i-Ride—beginning with its Fly Over the World project in Taiwan, Brogent is no longer merely a slogan. Within years, it has exploited its technological advantages with its hardware design integrated with creative software technologies. Brogent has extended its arm into the global sales channel with its hardware and software products, acquiring a solid status in the multimedia industry. Regardless of product safety or technological stability, Brogent has become increasingly mature with the globalization of the sales market, achieving the industry leader status. After flying across the world, the Company has also began planning the locations for the FlyOver project that are most representative of Taiwan; thus, tourists visiting Taiwan will be given an additional must-see tourist attraction.

Regarding the growth potential of the simulator ride market, according to the Global Entertainment and Media Outlook: 2012-2016 by PricewaterhouseCoopers, the total global entertainment spending will increase from US\$1600 billion in 2011 to US\$2100 billion in 2016, at a growth rate of 5.7%. Furthermore, Vekoma Rides Manufacturing BV, a well-known roller coaster manufacturer in Holland with over 40 years of history in the theme park market and possessing world-class clients

including Disney and Universal, estimated that there will be over 2000 large theme parks across the world. Moreover, numerous theme parks are in the process of construction as the spending power of these countries continues to rise.

The Chinese consulting firm CIConsulting reported that in 2011 - 2015, the Chinese theme park market will exceed RMB 10 billion each year, and in the next 25 to 30 years, at least 10 theme parks with a scale similar to that of Disneyland can be constructed in China. In the past, simulator rides involved high development cost and were restricted under Disneyland's patents, which made them relatively rare in theme parks. The Company's research team has devoted its efforts to acquiring patents from many countries, contributing to the Company's development in integrated software and hardware technologies and leveraging the advantages in manufacturing costs in Taiwan. By collaborating with internationally known marketing strategic partners, the Company has actively negotiated, planned, and constructed simulator rides from major theme parks all over the world. In recent years, countries in Europe and the US have gradually restructured existing large shopping centers, cinemas, and movie theaters in tourist attraction areas into popular leisure venues to attract visitors. Because a simulator ride can be customized according to the height restrictions of their buildings, they can provide consumers with an all-new entertainment experience. Simulator rides have become the focus of tourism industries in restructuring amusement facilities in Europe and the US. In summary, the business opportunities brought by the efforts of emerging countries in building amusement parks and of Europe and the US in reforming tourism facilities will contribute to the unlimited growth of simulator rides in the future.

4. Competitive Niches

A. Globally Recognized Technology

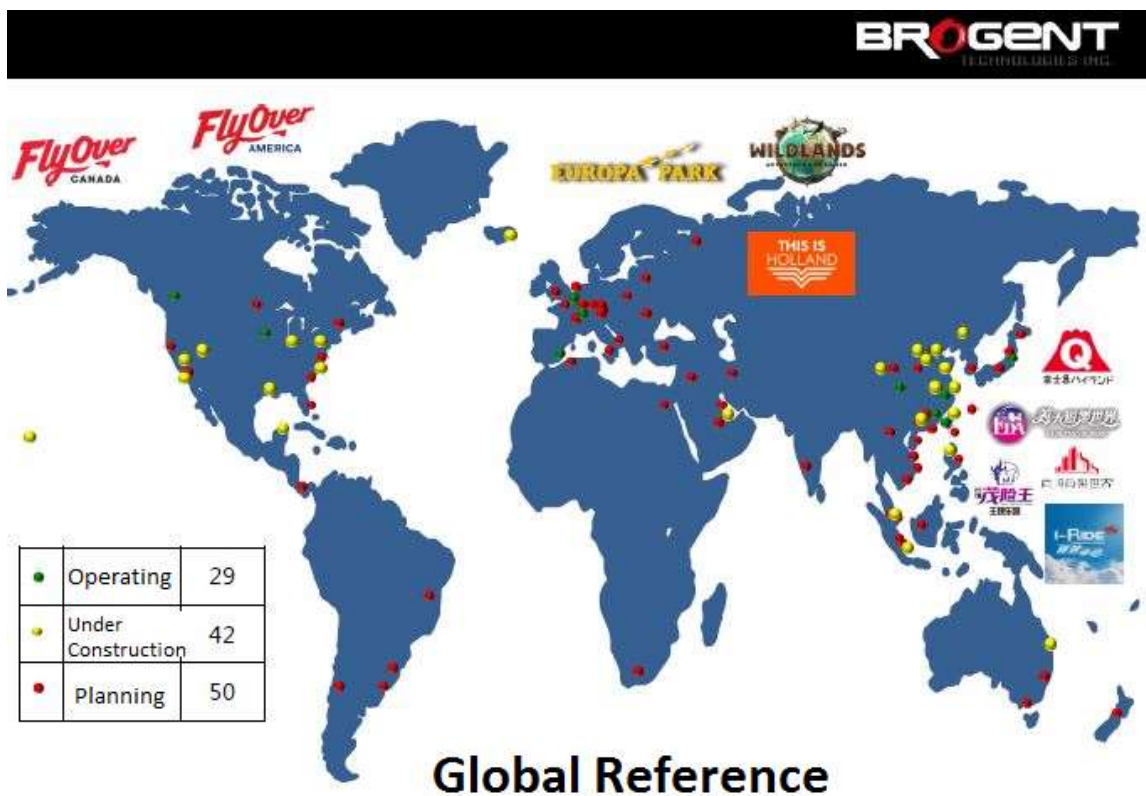

The Company's management teams are relatively experienced in the industrial sector, making them capable of launching new products to customers at the right time and rapidly responding to customer demand. In addition, our service quality is trusted by our clients, and the quality of our products is ensured during the software development process (including the design, implementation, and testing stages). Thus through enriched project management experiences, the Company offers customers excellent quality software services, contributing to the value of our software products.

In contrast to Disney's simulator rides, which feature a two-axis arm lift platform with two motion directions (heave and pitch), the Company's products adopt

a six motion direction side-standing suspended six-axis platform. Our platform not only enables riders to fully experience realism and enjoyment but also facilitates saving space in the theater. Thus, business benefits could be maximized by adequately utilizing the space in the theaters. The Company has applied for patents from Taiwan, China, the United States, and the European Union for the side-standing suspension framework of the six-axis platform to protect our technology and increase the threshold for other vendors to enter the market.

B. Premium Brand Equity

Theme parks, museums, and exhibition centers are generally a closed market. The Company combines the marketing channels of internationally well-known theme park facility suppliers, enabling the successful transition into the theme park supply chain. This transition will be advantageous for expansion into the global market. Furthermore, the Company possesses excellent professional technological know-how and development experience; its products are strongly recognized by international clients. From 2008 to 2017, product sales distribution has gradually extended into international communities; Brogent’s products can be found in the following locations:

In 2017 the main focus for openings was in Europe with a major mile stone opening of a double i-Ride installation at Europa-Park, Germany's leading theme park. The attraction also received the European Star Award as best new ride in 2017. We had two more openings with "This is Holland" in Amsterdam and at a major theme park in Spain. Our future business development will continue to involve market internationalization to expand our marketing scope of the global market, thereby improving the overall revenue performance.

C. Product modularization lowers cost and increases competitiveness

Simulator ride facilities involve a wide range of technical aspects, covering hardware systems (suspension, spherical screen with audiovisual systems) and software technologies (projector, playback, wireless embedded control, and high-definition digital content). Therefore, the technical teams of the Company performed high modularization engineering analysis and planning of large complex system frameworks based on the existing six-axis platform technologies. In addition, our design, production, transportation, and assembly processes are all designed and modularized in accordance with international standard regulations. Such modularization enables saving large amount of construction time and manpower, which considerably lowers construction cost and raises the Company's competitiveness.

D. Collaboration with international strategic partners in digital content development

The Company holds a solid foundation for software technology development. Brogent supports the software technology development required for simulator rides. In 2013, the flying theater i-Ride received the attention of Kodansha. Through the assistance of the Institute for Information Industry Taiwan - Japan Industry Promotion Center, the Company signed the first memorandum of understanding (MOU) with Kodansha in October 2013. Thereafter, frequent business meetings were held with the Japanese company, with the hope of integrating Brogent's product technologies with Kodansha's manga series to launch a highly entertaining amusement facility. The manga of choice in this cooperation was the popular Attack on Titan. With Kodansha's support, Brogent officially received authorization for the manga series Attack on Titan, and began producing related films for the i-Ride facility.

In 2015, both parties once again signed an MOU with the premise of expanding their scope of cooperation to including all of Brogent's simulator ride products. Thus, Kodansha's numerous, popular works can now be displayed through Brogent's simulator rides and technologies, enabling passengers to immerse themselves in the story. Concurrently, the Company collaborates with suppliers of peripheral products; sales channels for these products will be established while theme-based entertainment activities are launched to allow passengers to receive satisfactory services and products. Consequently, a new sales platform will be created, elevating the value of cultural and creative products.

5. Competitive Edge, Favorable and Adverse Factors for Long-term Growth and Response Strategy

(1) Favorable factors

A. Needs of emerging countries and reconstruction business opportunities in Europe and the US

As the economy of emerging countries develop, these countries have gradually focused on the construction and development of leisure entertainment industries, specifically large theme parks, the existence of which can not only create domestic demand and employment opportunities, but also promote urban tourism development. Low income level in emerging countries render the entrance fees to theme parks in these countries incomparable to those in developed countries (e.g., European countries, North America, and Japan). To effectively increase the economic benefits of amusement parks, governments of emerging countries strictly regulated the benefits generated by amusement facilities. In addition, because indoor amusement facilities allow customers to still enjoy themselves during bad weather, and because of the rapid development of digital audiovisual technologies in recent years, traditional mechanical amusement facilities are no longer effective for attracting the attention of new-generation tourists. Therefore, when planning and constructing theme parks, emerging countries typically prioritized their focus on indoor amusement facilities that feature 3D sound and lighting effects and stimulate a sense of excitement in users. To reconstruct their tourism industries and boost their economy, European countries and the US have successively initiated tourist attraction reform projects, building leisure facilities by restricting existing buildings and movie theaters. These leisure facilities are based on a composite business model comprising department stores and hotels to attract visitors. Because simulator rides are built according to the height restrictions of existing buildings to provide consumers with an all-new entertainment experience, this type of facility became

the primary focus of Europe and the US in reconstructing amusement facilities.

B. Construction and formation of industry supply chain

Before the Company entered the simulator ride market, there were no vendors investing in similar products in Taiwan. Since undertaking the “Taiwan Formosa” project for E-DA Theme Park, the Company has adequately leveraged Taiwan's strong R&D and production capabilities of information hardware and precision machinery industries. With the efforts devoted by the Company's R&D personnel and domestic vendors, Taiwan has become one of the few countries worldwide capable of constructing simulator ride bases. Not only were the production costs of amusement facilities lowered, but the quality of these facilities reached international standard. Subsequently, a complete and tight supply chain in the simulator ride industry was established. Because simulator rides are completely customized according to customer needs, the Company's supply chain system enable the design, motion control, or digital content of such rides to be adjusted whenever required depending on customer needs. Thus, customer demand can be satisfied, thereby increasing the overall competitiveness of the Company.

C. Establishing word of mouth facilitates business promotion

Distinct from general consumer electronic products, simulator rides feature long life cycle, high degree of customization, high technical threshold, and high cost; therefore, customer repurchase and loyalty increased after establishing the word of mouth for the technology and quality of this product. Since completing “Taiwan Formosa” and “FlyOver Canada” projects, the Company has accumulated considerable experience, word of mouth, and popularity in the simulator ride market. The 2016 opening of “FlyOver America” created additional buzz. In addition, by forming strategic alliance with internationally well-known amusement facility suppliers, the Company will acquire more competitive advantage in business expansion.

D. Supported by strong technology

Since its inception in 2001, the Company has endeavored to develop audiovisual multimedia technologies, accumulating considerable experiences in technological development. Thus, the Company has established partnership with multiple international mobile phone factories, and received Small Business Innovation Research (SBIR) subsidies from the Ministry of Economic Affairs

(MOEA) multiple times. In 2007, the Company was honored with the award of excellence in SBIR from the Department of Industrial Technology, MOEA. Regarding simulator ride facilities, the Company has received recognition for its technological capability since the successful implementation of the FlyOver Taiwan and FlyOver Canada projects. For example, the unique fish eye lens designed by the Company can achieve the projection effects of a spherical screen simply by installing them with a projector. Thus, the cost and space required for projector installation are substantially reduced, and the stability and image quality of the projector system are considerably enhanced. The Company's self-developed automated control technology can integrate motion platforms with video systems with increased precision. This way, riders can perceive the flow experience of realism. Furthermore, the Company also possesses the capacity to develop digital content, and customize it according to customer needs, thereby providing multiple choices to our customers. Therefore, the Company enhances the technological capacity of its research team, and therefore has substantial room for improvement.

(2) Unfavorable factors and their response strategies

A. Closed sales channel for simulator rides, impeding business expansion

Simulator rides are primarily built in theme parks, museums, and exhibition halls. Unlike general daily necessities, the sales channel of simulator rides is relatively closed, and suppliers specializing in this market are mostly business operators who have established their status for a long time. Thus, new vendors cannot easily directly enter this supply chain system and expand their businesses.

Response strategies:

The Company fully understands the characteristics of this industry. To expand its market and increase its market share, the Company formed a strategic alliance with internationally known suppliers of amusement facilities who have had a history of more than 40 years in the industry. These suppliers assist the Company in expanding its market channel to successfully enter the supply chain of the theme park industry and facilitate its expansion into the global market. In addition, the Company adopts "experiencing in an urban setting" as a strategy to actively develop miniature simulator rides and compete in the market.

B. Shortage of professional talent, hindering talent recruitment

Because information electronic related industries remain the dominant of the domestic market, and domestic vendors have already established a complete supply

chain in the information hardware industry, general graduates still prefer to enter industries relevant to information electronics. Furthermore, domestic universities and colleges have established faculty departments associated with software design or amusement facilities in recent years. However, talent still require additional training, and simulator ride technologies encompass a wide variety of aspects, thus making R&D talent recruitment and cultivation difficult.

Response measures:

Engage in industry-academia cooperation to cultivate high-quality experts of digital content development and foster technological talent that industries require; provide employees with favorable working environment, perfect employee welfare systems, and formulate reward/punishment systems as well as employee training programs; and establish job positions according to employees' expertise and characteristics and provide employees with the opportunity to become a shareholder of the Company so that they could share business outcomes with the Company, thereby cohering their efforts and reducing turnover rate.

C. Raw material price and supply stability

The hardware system of the Company's simulator rides comprises the following: The raw materials of carriers, six-axis platform, and steel structures are mostly steel and iron. The prices of these raw materials may vary according to market supply and demand, causing price fluctuations, thereby influencing the Company's purchasing cost and profitability.

Response strategies:

In addition to having maintained a positive and long-term cooperative relationship with its suppliers, the Company appropriately adjusts its sources of procurement and disperses different purchasing vendors to seek the most optimal price quotation. Thus, over-concentration in purchasing, thereby increasing operating risks can be avoided.

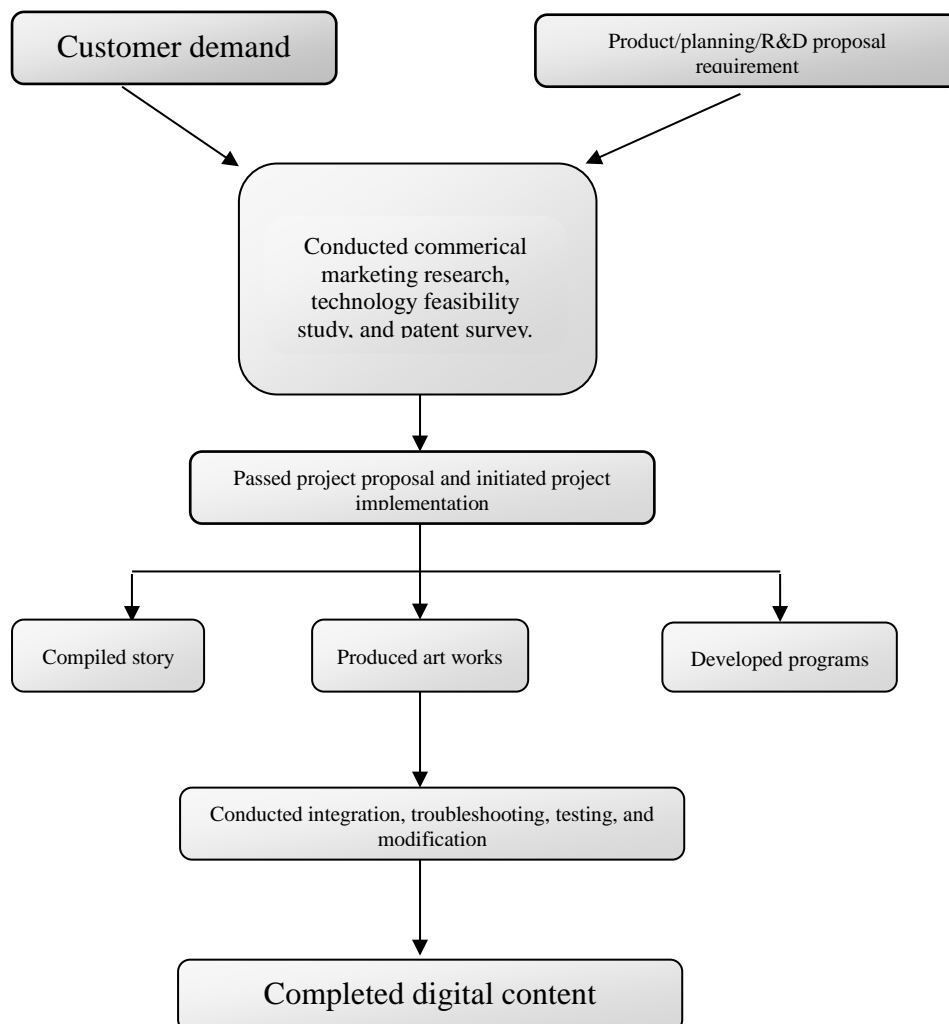

(2) Major product usage and manufacturing processes

1. Main purposes

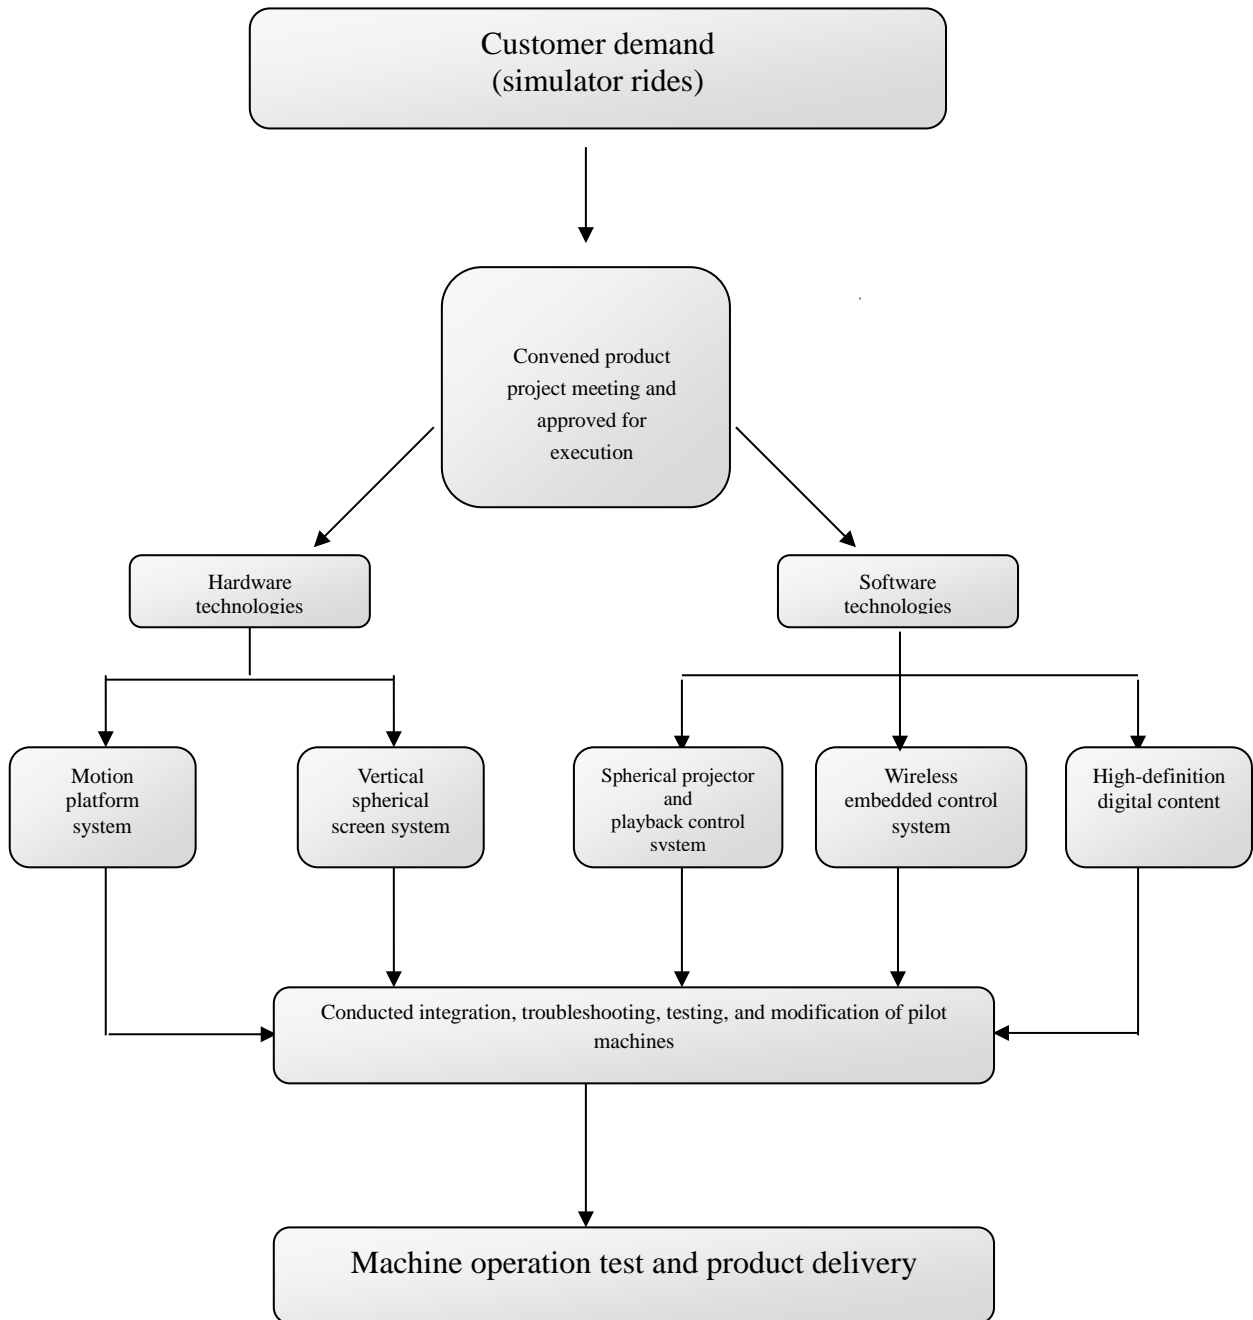

Theme park, museum, exhibition hall, shopping center, and indoor experience center afford entertainment and educational functions, provide adventurous experiences, and elicit sense of excitement.

2. Manufacturing process

A. Digital content:

B. Simulator rides:

3. State of supply of chief raw materials

Primary spare parts	Supply condition
1.Stewart six-axis platform	Good, stable
2.Structure of ride carriers	Good, stable
3.Spherical screen	Good, stable
4.Servo valve, motor	Good, stable
5.Projector	Good, stable
6.Acoustic equipment	Good, stable
7.Digital content contractor	Good, stable

The Company develops its own mobile device software instead of outsourcing it. The hardware and software systems of the simulator rides are designed and developed by the Company. Regarding the mechanical hardware parts, the Company cooperates with its vendor and commissions contractors for assistance. The Company and its suppliers have a stable cooperative relationship, facilitating the stable material supply. Therefore, there were no incidences of supply interruption.

4. Major buying and selling vendors/customer information

(1) Names of customers who accounted for more than 10% of the sales in the last two years, sales as a percentage of total sales, and reasons of change

Unit: NT\$1,000

Item	2016				2017			
	Name	Amount	Percentage of net sales (%)	Relationship with issuer	Name	Amount	Percentage of net sales (%)	Relationship with issuer
1	DEU0001	252,980	28.69%	None.	CHN0005	398,228	58.24%	None.
2	ESP0001	118,480	13.44%	None.	CHN0006	280,645	41.05%	None.
3	ARE0001	111,023	12.59%	None.	CHN0014	151,871	22.21%	None.
4	NLD0003	103,201	11.71%	None.				None.
	Others	295,986	33.57%		Others	683,725	45.15%	
	Total	881,670	100.00%		Total	1,514,469	100.00%	

Reasons for changes:

The Company's chief products are simulator rides. Because simulator ride projects involve high costs, the sales target in the most recent two years is customers who purchase simulator rides. In 2017, the Company successfully extended its reach into the overseas market. Nearly 10% of the net sales in 2017 are new buyers of the Company's customer orders. The major projects were under construction and the revenues were received according to the percentage of completion.

To increase its market share in the global market, the Company continues to work with international vendors and Taiwanese vendors, actively vie for their cooperation, and devoted to seeking new client base to disperse sources of customer order and maintain robust growth.

(2) Names vendors who accounted for more than 10% of the purchases in the last two years, purchases as a percentage of total purchase, and reasons of change

Unit: NT\$1,000

Item	2016				2017			
	Name	Amount	Percentage of total purchase (%)	Relationship with issuer	Name	Amount	Percentage of total purchase (%)	Relationship with issuer
1	A0000008	95,040	22.76%	None.	A0000419	110,139	24.97%	None.
2	A0000072	46,020	11.02%	None.	A0000012	44,450	10.08%	None.
3	A0000012	45,468	10.89%	None.	A0000008	43,335	9.83%	None.
	Others	231,024	55.33%		Others	243,095	55.12%	
		417,552	100.00%			441,019	100.00%	

Reasons for changes:

To develop simulator rides, the Company adequately uses the technical strength, flexibility, and willingness of small and medium enterprises to cooperate. In addition, the Company plans, designs, and collects the various technical and production information of international companies, commissioning contractors to manufacture our products. Furthermore, the Company cooperates with small and medium enterprises to construct the supply chain system of simulator ride facilities. The Company primarily procures six-axis platform, ride carriers, spherical screens, servo valve, and projector and acoustic equipment. Except for when customers designate their preferred suppliers, the Company's suppliers are selected according to their quality, stability, delivery date, and price.

The Company made a total purchase of NT\$110,139 thousand to supplier A0000419, who became the company's largest supplier in 2017. A0000012 is the Company's second largest supplier of the spherical screen manufacturer, from whom the Company made a total purchase of NT\$44,450 thousand in 2017. A0000008 is the Company's third largest supplier of steel structures and push carriers from whom we made a total purchase of NT\$43,335 thousand. Overall, the changes in the primary suppliers of the Company in the past two years were based on the project scale and job completion progression. There were no major

abnormalities.

5. Output volume and value during the most recent two years

The Company's primary business involved the R&D and sales of simulator rides. Since 2008 when the Company started the development and selling of simulator ride facilities, these facilities, including their hardware and software systems and automated control system, were designed and developed by the Company. The mechanical body engineering part was commissioned to external contractors, and the Company purchases the final product from the supplier and therefore is not a manufacturing industry. Thus, the Company is not associated with output volume and value.

6. Sales volume and value during most recent two years

Unit: NT\$1,000

Year	2016				2017			
	Domestic sales		Exports		Domestic sales		Exports	
Primary products	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value
Mobile device software	-		-		-	-	-	
Simulator rides	-	69,314	-	748,795	-	-	-	1,436,045
Others (Note)	-	38,252	-	25,309	-	20,277	-	58,147
Total	-	107,566	-	774,104	-	20,277	-	1,494,192

Note: Others refer to repair and maintenance and income generated sales (gaming machines) and labor affairs

Reasons for changes:

The Company's adjustment to its sales strategy to reduce the number of customized software projects accepted. Regarding the simulator ride, the external sales amount increased in 2017 compared with 2016; this is primarily attributed to the successive orders received from the overseas market in 2017.

III. Employee Information in the Past 2 Years to the Date of the Annual Report

Year		End of 2016	End of 2017	Up to March 31, 2018
Number of employees	Managerial officer	25	20	20
	R&D personnel	97	78	82
	General employee	47	46	46
	Total	169	144	148
Average age		34.07	34.07	34.95
Average years of service (year)		3.10	3.10	3.06
Education distribution (%)	Ph.D	1.8	2.1	2.0
	Master's	47.9	51.3	52.1
	University	43.2	38.2	39.2
	College	5.3	6.3	4.7
	Senior high school	1.8	2.1	2.0

IV. Environmental protection expenditure information

(1) The Company primarily engages digital content development and selling of simulator rides, the production of which is entirely outsourced to external contractors. Therefore, the Company is not associated with pollution concerns.

1. According to laws and regulations if it is required to apply for a permit for installing anti-pollution facilities, or permit of pollution drainage, or to pay anti-pollution fees, or to organize and set up an exclusively responsible unit/office for environmental issues, the description of the status of such applications, payment or establishment shall be made: Not applicable.
2. Setting forth the company's investment in the major anti-pollution facilities, the use purpose of such facilities and the possible effects to be produced: None.
3. Describe the process undertaken by the company on environmental pollution improvement for the most recent 2 fiscal years and up to the publishing date of the annual report. If there had been any pollution dispute, its handling process shall also be described: None.

4. Describe the loss (including damage compensations paid) suffered by the company due to environmental pollution incidents occurred in the most recent 2 fiscal years and up to the annual report publishing date, the total penalty/fine amount, as well as disclosing its future preventive policies (including improvement measures) and possible expenses to be incurred (including possible loss if no preventive measures are taken, and the penalties and estimated damage compensation amount; if reasonable estimation cannot be made, explanation on the facts why it cannot be made shall be stated): None.

5. Explain the current condition of pollution and the impact of its improvement to the profits, competitive position and capital expenditures of the company, as well as the projected major environment-related capital expenses to be made for the coming 2 fiscal years: None.

(2) The 2nd stage of R&D and experience center was completed in 2016 and awarded the green building certificate issued by Ministry of the Interior (Certification No. GB-BC-01-00164 on 105.12.16) The related green power arrangement is explained as followings:

1. Installation of solar power-Using the roof space to install solar electric power generation can output electricity without any pollution, noise and danger ; Besides, the solar panels are able to beautify the roof, resist the irradiation of sun, and reduce indoor temperature in summer for energy saving and carbon reduction

2. Installation of central air-conditioning control system-The air-conditioning is operated by the central air-conditioning control system. It can monitor the situation of all air-conditionings for avoiding unnecessary waste

3. Installation of all heat exchangers-All heat exchangers, as a part of the central air-conditioning control system, it achieves increasing the air convection, improving indoor air quality(reduce CO2 concentration), decreasing the electricity fee and energy loss made by air exchange

4. Build up rain storage and recycle irrigation systems-We recycle rain and

store it after filtering, in order to irrigate the plants. In this way, we can reuse the resource and cut down the waste of water resource

5. Use LED lighting system-All of office area and the test area of factory building are equipped with LED lighting. Additionally, we have the switch schedule to every illumination area for energy saving and carbon reduction

6. Set up indoor air quality supervisory system-We regularly supervise the indoor pollutants, and ensure air quality with the current National and International Standards.

- (3) Brogent technologies INC. is an executive and administrative office instead of manufacturing industry in Kaohsiung Software Park. We are willing to be coordinate with the government policy to promote every energy saving measures
- (4) We make effort to develop every energy saving measures aggressively. We take measures to use the office supplies with energy saving mark, increase the usage rate by managing the classification of waste, and strengthen indoor greening to improve air quality
- (5) Brogent technologies INC. belongs to cultural and creative industry and our products are mostly made by subcontractors. We enact the safe policy and irregularly execute the training of labor safety. Our security system and environment maintenance are both responsible by the professional subcontractors. All of the fire equipments are regurly maintained and declared by the related departments; In addition, the access control is restricted by the identification card. For safety, everyone has to swipe the identification card to get in each entrance.

V. Labor Relations

1. Set forth all employee benefits, continuing education, training, retirement systems, and the status of their implementation, as well as the status of agreements between labor and management, and all measures aimed at preserving the rights and interests of employees:

(1) Employee welfare measures and implementation status

The Company offers the following welfare to its employees: labor and health insurance, employee group insurance, business travel accident insurance, employee health examination, holiday bonus, year-end bonus, employee stock option bonus, and allowances for marriage, bereavement, and maternity as well as year-end party.

In addition, the Company has also set up an Employee Welfare Committee that handles employees' various welfare affairs, including employee marriage, funeral, sick leave, and maternal leave subsidies, annual employee travel benefit, three-festival bonuses (Dragon Boat Festival, Moon Festival, and Chinese New Year), birthday bonus, seasonal gatherings and family days.

(2) Employee continuing education, training, and status of their implementation

To enhance employee quality and their work efficiency and quality, the Company requires all its new recruits to receive immediate training and guidance on their job content. During their period of employment, employees must regularly undergo professional training, both internal and external, on employee job duties. Internal training courses entail exchanging internal professional technologies and improving employee productivity; external courses depend on company requirements. Employees may be dispatched to attend external seminars and courses. Thus, the Company's employees are provided with opportunities to receive professional training. Actual training attendance is registered and managed with the hope of fostering professional talent and effectively nurture and utilize talent.

(3) Employee pension system and status of implementation

The Company regulates employee pension system according to the Labor Standard Act, formulates Employee Retirement Regulation, and establishes labor pension account with the Central Trust of China to which a labor pension reserve equivalent to 10% of employees' monthly salary is contributed. As of July 1, 2005, when the new labor pension system was implemented by the government, the Company asks its employees whether they wish to adopt the new or old labor

pension systems. Employees who prefer the new pension system shall have 6% of their monthly salary contributed to their personal pension account and shall retain their seniority status as required by the Labor Standard Act, to ensure their living needs after they retire. No employees have retired since the Company's establishment.

(4) Labor negotiations

The Company is subject to the Labor Standard Act, operating its business in accordance with the Labor Standard Act. Generally, the Company emphasizes the importance of employee welfares and communication with its employees; therefore, it has maintained a harmonious relation with its employees. In addition, to maintain positive labor relation, the Company attaches increased importance on employee opinions, which can be communicated by the employees via email. Since its establishment, the Company has not been involved in labor disputes. However, the Company will still strengthen its labor communication protocols and endeavor to formulate effective welfare measures for its employees so that a more harmonious labor relationship can be sustained to prevent any possibilities of labor disputes from occurring.

(5) Measures for protecting employee rights and interests

The Company has a complete document management system that specifies various management regulations, employee rights and obligations and their welfares, to protect employee rights and interests.

(6) Preventive measures taken to ensure a safe working environment and maintain employees' personal safety:

The Company hires designated personnel to plant flowers and trees in vacant spaces surrounding the Company. By applying the practice of landscape greening, the Company creates a comfortable, safe working environment and plans an effective parking space. The Company constructs a safe, healthy working environment and regularly provides employee health examination to maintain employee physical and mental health. In addition, a Labor Safety and Health Committee is established to engage in promotion efforts for environmental protection and labor safety and health. The Company also offers employee safety and health training programs to help employees enhance their health and safety related knowledge and skills.

2. Describe the loss suffered by the company due to labor disputes occurring in the most recent 2 fiscal years and up to the annual report publishing date, and disclose the estimated amount expected to be incurred for the present and future as well as the preventive measures:

The Company maintains a harmonious relationship with its employees. There were no losses incurred from incidences of labor disputes during the most recent 2 years up to the publishing date of the annual report. The Company upholds the principle of maintaining a reciprocal relationship and sharing profits with its employees. There is minimum likelihood of losses due to labor disputes occurring in the future.

VI. Important contracts

Nature of contract	Contracting parties	Date of contract start and end	Content	Restriction clauses
Sales	China Company CHN0014	2017.12.06~May terminate the contract according to agreement	Simulator rides	Exclusivity for designated area
	China Company CHN0015	2017.08.28~May terminate the contract according to agreement	Simulator rides	None.
		2017.12.25~May terminate the contract according to agreement	Simulator rides	
	Australia Company AUS0001	2017.12.21~May terminate the contract according to agreement	Simulator rides	None.
	Malaysia Company MYS0001	2017.09.13~May terminate the contract according to agreement	Simulator rides	None.
	Mexico Company MEX0001	2017.11.20~May terminate the contract according to agreement	Simulator rides	None.
Land Rental	Export Processing Zone Administration, MOEA	2012.3.14 - 2032.3.13	Renting of Kaohsiung Software Park Land	None.
Loan	Taiwan Cooperative Bank	2016.04.11 - 2031.10.13	Long-term collateral-based loan application	None.

VI. Financial Overview

1. Condensed balance sheets and statement of income (2013 - 2017)

(1) Condensed balance sheets

1. Condensed balance sheets- International Financial Reporting Standards (IFRS)- Consolidated

	Net profit margin (%)		(1.79)	27.06	16.27	11.71	22.1	-
	Earnings per share (NT\$)		(0.22)	6.83	2.57	2.30	6.00	-
Cash flows	Cash flow ratio (%)		53.14	28.21	(50.73)	(7.61)	11.83	-
	Cash flow adequacy ratio (%)		15.2	(25.39)	25.92	15.78	16.15	-
	Cash reinvestment ratio (%)		9.69	4.79	(17.96)	(5.80)	(3.1)	-
Leverage	Operating leverage		11.47	1.12	1.37	1.66	1.41	-
	Financial leverage		(0.69)	1.01	1.00	1.03	1.02	-

Reasons for changes in financial ratios in the most recent 2 years. (Can be left blank if the increase or decrease is less than 20%)

1. Solvency, operating ability and profitability were improved mainly because of the growth of 2017 revenue.
2. Cash flow ratio increased by the net cash generated from operating activities in 2017.

Note 1: The 2013-2017 Financial Reports of the Company have been reviewed by the CPA.

Note 2: The Company primarily focuses on the R&D and design of simulator rides by using its design, R&D, and system integration capabilities as well as the hardware equipment of outsourced vendors. Because the Company's core value is its design, R&D, and system integration capabilities, its business characteristic differs from general manufacturing industries in that the Company manufactures and sells physical products. Therefore, inventory turnover ratio is not calculated.

Note 3: The company does not have individual financial report as of March 31, 2018

Note 4: The following calculation formulas shall be displayed at the end of the tables of the annual report.

1. Financial structure

(1) Debt-to-asset ratio = total liabilities / total assets.

(2) Long-term fund to property, plant and equipment ratio = (total equity + non-current liabilities) / net property, plant and equipment.

2. Solvency

(1) Current ratio = current assets / current liabilities.

(2) Quick ratio = (current assets - inventory - prepaid expense) / current liabilities.

(3) Times interest earned = net income before income tax and interest expense / current interest expense.

3. Operating ability

(1) Receivable (including accounts receivable and business-related notes receivable) turnover ratio = net operating revenue / average balance of receivable of the period (including accounts receivable and business-related notes receivable).

(2) Average days of collection = 365 / receivables turnover ratio.

(3) Inventory turnover ratio = cost of goods sold / average amount of inventory.

(4) Payable (including accounts payable and business-related notes payable) turnover ratio = cost of goods sold / average balance of payable of the period (including accounts payable and business-related notes payable).

(5) Average days of sales = 365 / inventory turnover ratio.

(6) Property, plant and equipment turnover ratio = net sales / net average property, plant and equipment.

(7) Total assets turnover ratio = net sales / total average assets.

4. Profitability

(1) Return on assets = [net income + interest expense (1 - tax rate)] / average total assets.

(2) Return on equity = after-tax profit / total average equity.

(3) Net profit margin = net income / net sales.

(4) Earnings per share = (income attributable to owners of parent - dividend to preferred stock) / weighted average of shares issued. (Note 4)

5. Cash flows

(1) Cash flow ratio = new cash flows from operating activities / current liabilities.

(2) Cash flow adequacy ratio = net cash flows from operating activities in the past five years / (capital expenditure + increase in inventory + cash dividend) in the past five years.

(3) Cash reinvestment ratio = (net cash flows from operating activities - cash dividend) / (gross margin of property, plant and equipment + long-term investment + other non-current assets + working capital). (Note 5)

6. Leverage:

(1) Operating leverage = (net operating income - variable operating cost and expenses) / operating income (Note 6).

(2) Financial leverage = operating income / (operating income - interest expense).

Note 5: Precautions shall be taken when measuring the aforementioned earnings per share:

1. Based on the weighted average number of ordinary shares, rather than on the year-end number of issued shares.

2. Weighted average number of shares shall be based on the flow period during capital increase or treasury stock transactions.

3. For earnings transfer or capital reserve transfer, annual and semiannual earnings per share shall be tracked and adjusted according to the proportion of capital increase without considering the

issuance period when capital increased.

4. If the preferred stocks are nonconvertible cumulative preferred stocks, the annual stock dividend (issued or not issued) shall exclude after-tax income or include after-tax loss. If the preferred stocks are noncumulative, then when there is after-tax income, preferred stocks shall exclude after-tax income, and no adjustment to preferred stocks is required when there are losses.

Note 6: The following precautions shall be taken when measuring cash flow:

1. Net cash flow of business activities refer to the net cash inflow in the company's business activity.
2. Capital expenditure refers to the cash outflow for annual capital investments.
3. Increase in inventory is calculated only when the balance at the end of a period exceeds the balance at the initial period; if the year-end inventory is reduced, then it shall be zeroed.
4. Cash dividend includes the cash dividend from holding ordinary and preferred stocks.
5. Gross property, plant, and equipment refer to the total property, plant, and equipment values before cumulative depreciation.

Note 7: Issuer shall categorize operating costs and expenditures into fixed or variable costs and expenditures according to their characteristics; when costs and expenditures are estimated or subjectively determined, their rationality and consistency shall be ensured.

Note 8: When company stocks have no face value or the face value per share is not NT\$10, face value to paid-in capital shall be calculated according to the equity ratio that is based on the balance sheets of the owner of the parent.

3. Supervisor Review Report
Refer to Appendix 2.
4. Financial Report and CPA Review Report
Refer to Appendix 3.
5. Individual financial report reviewed by CPA
Refer to Appendix 3 of the company's Chinese version 2017 annual report.
6. Financial difficulties and corporate events encountered by the Company and affiliates in the past two years and up to the date of report that have material impact on the financial status of the Company: None.

VII. Precautions of Review and Analysis of Financial Status and Business Performance

1. Financial status

(1) Consolidated

Unit: NT\$1,000

Item \ Year	2016	2017	Variation	
			Amount	%
Current assets	2,238,894	2,203,637	(35,257)	(1.57)
Property, plant and equipment	804,714	951,441	146,727	18.23
Other assets	247,236	319,824	72,588	29.36
Total Assets	3,290,844	3,474,902	184,058	5.59
Current liabilities	307,270	313,143	5,873	1.91
Non-current liabilities	336,388	356,039	19,651	5.80
Total liabilities	643,658	669,182	25,524	3.97
Share capital	446,780	446,780	-	-
Capital reserve	2,052,669	2,053,485	816	0.04
Undistributed earnings	211,682	366,258	154,576	73.02
Total shareholders' equity	2,647,186	2,805,720	158,534	5.99

Analysis and explanation of changes:

- (1) Increase in other assets in 2017 was attributed to the reclassifying the current assets.
(2) Increase in undistributed earnings in 2017 was because of the revenue growth.

(2) Individual

Unit: NT\$1,000

Item \ Year	2016	2017	Variation	
			Amount	%
Current assets	1,939,408	1,881,423	(57,985)	(2.99)
Property, plant and equipment	617,103	704,900	87,797	14.23
Other assets	584,472	661,572	77,100	13.19
Total Assets	3,140,983	3,247,895	106,912	3.40
Current liabilities	322,545	289,921	(32,624)	(10.11)
Non-current liabilities	224,388	210,976	(13,412)	(5.98)
Total liabilities	546,933	500,897	(46,036)	(8.42)
Share capital	446,780	446,780	-	-
Capital reserve	2,052,669	2,053,485	816	0.04
Undistributed earnings	211,682	366,258	154,576	73.02
Total shareholders' equity	2,594,050	2,746,998	152,948	5.90

Analysis and explanation of changes:

- (1) Increase in undistributed earnings in 2017 was because of the revenue growth.

2. Financial performance

(1) Comparative analysis of business performance- Consolidate

Unit: NT\$1,000

Item	Year	2016	2017	Change (amount)	Variation as a percentage (%)
Sales revenue		881,670	1,514,469	632,799	71.77
Less: Returns and Allowances		-	-	-	-
Net revenue		881,670	1,514,469	632,799	71.77
Operating cost		436,733	789,135	352,402	80.69
Gross profit		444,937	725,335	280,398	63.02
Operating expenses		336,429	384,601	48,172	14.32
Operating income		108,508	340,734	232,226	214.02
Non-operating income and gain		34,029	45,881	11,852	34.83
Non-operating expense and loss		12,953	(59,052)	46,099	355.89
Income (loss) before tax		129,584	327,563	197,979	152.78
Income tax benefits (expenses)		(23,472)	(56,382)	32,910	140.21
Net profit (loss)		106,112	271,181	165,069	155.56
Analysis and explanation of changes:					
(1) Increase in net revenue, gross profit is due to the growth of the company's business in 2017.					

(2) Comparative analysis of business performance- Individual

Unit: NT\$1,000

Item	Year	2016	2017	Change (amount)	Variation as a percentage (%)
Sales revenue		865,220	1,202,199	336,979	38.95
Less: Returns and Allowances		-	-	-	-
Net revenue		865,220	1,202,199	336,979	38.95
Operating cost		474,779	662,088	187,309	39.45
Gross profit		395,515	540,111	144,596	36.56
Operating expenses		284,543	321,050	36,507	12.83
Operating income		110,972	219,061	108,089	97.40
Non-operating income and gain		34,513	131,941	97,428	282.29
Non-operating expense and loss		24,050	50,905	26,855	111.64
Income (loss) before tax		121,435	300,097	178,662	147.12
Income tax benefits (expenses)		(20,081)	(34,427)	14,346	71.44
Net profit (loss)		101,354	265,670	164,316	162.12
Analysis and explanation of changes:					
(1) Increase in net revenue, operating cost, gross profit and operating expenses is due to the growth of the company's business in 2017.					
(2) Non-operating expense and loss is caused by the recognition of loss on financial assets at fair value through profit or loss					
(3) Increase in income tax expense was caused by reasons mentioned above.					

(3) Expected Sales Volume and Criteria

On the basis of current industrial environment and future market supply and demand, as well as information relevant to R&D schedule and business development, the Company expects its business to growth steadily in 2018.

3. Cash flows

(1) Analysis on the cash flow changes - Consolidated

Unit: NT\$1,000

Item	2016	2017	Changes (increase/decrease)
Net cash inflow (outflow) from operating activities	(171,326)	172,390	343,716
Net cash inflow (outflow) from investing activities	(133,529)	165,023	298,552
Net cash inflow (outflow) from financing activities	86,699	(106,572)	(193,271)

Analysis and explanation of changes:

- (1) In 2017, net business cash inflow increased primarily because of the change of net income and related assets and liabilities.
- (2) In 2017, net investment cash inflow increased primarily because of Acquisition of held-to-maturity financial assets.
- (3) In 2017, the net financing cash outflow increased because of cash dividends paid.

(2) Analysis on the cash flow changes - Individual

Unit: NT\$1,000

Item	2016	2017	Changes (increase/decrease)
Net cash inflow (outflow) from operating activities	(51,514)	34,291	85,805
Net cash inflow (outflow) from investing activities	82,995	242,388	159,393
Net cash inflow (outflow) from financing activities	(51,270)	(128,259)	(76,989)

Analysis on the cash flow changes of in these two years:

- (1) In 2017, net business cash inflow increased primarily because of net income and the change of related assets and liabilities.
- (2) In 2017, net investment cash inflow increased primarily because of Acquisition of held-to-maturity financial assets, acquisition of investments accounted for using equity method, and the construction of the Phase 2 R&D Testing and Experience Center.
- (3) In 2017, the net financing cash outflow increased because of cash dividends paid.

(3) Improvement plan for inadequate liquidity: None.

(4) Cash flow analysis for the coming year

Unit: NT\$1,000

Cash balance, beginning	Expected cash flow from operating activities	Expected cash flow from investment and financing activities	Expected cash surplus (deficit) + -	Remedial measures for expected cash deficit	
				Investment plan	Financing plan
710,647	200,000	(423,992)	486,655		

- (1) Expected cash flow from operating activities: Cash inflow will be attribute to net income and the change of related assets and liabilities.
- (2) Expected cash flow from investment and financing activities: Cash inflow will be attribute to share of the profit of subsidiaries and associates and interest earned.
- (3) Remedial measures for expected cash deficit: None

4. Effect of major capital spending on financial position and business operation

(1) Major capital spending and sources of funds

Unit: NT\$1,000

Project	Actual or expected source of funds	Actual or estimated completion date	Total funding need	Actual or expected status of spending	
				2016	2017
Business office	Market fund-raising	106.11	940,000	418,063	-

(2) Anticipated benefit

- (1) Enhance R&D testing capacity to increase corporate competitiveness
- (2) Integrate office and plant to raise operational efficiency
- (3) Improve working environment to increase employee commitment

5. Investment policy in the past year, profit/loss analysis, improvement plan, and investment plan for the coming year

(1) Investment transfer policy

The Company currently focuses its investment transfer policy on business investment related targets and does not invest in other businesses. Related executing department handles affairs according to the Investment Circulation regulations of its internal control system and Procedure for Processing the Acquisition and Disposal of Assets, both of which have been reviewed and approved by the Board of Directors.

(2) Reasons for investment profit or loss in recent years

In accordance with the Company's business expansion and future development, Brogent's subsidiaries were set up in 2015 and 2016 for different purposes listed as below:

Investee Company	Business Scope
Brogent Mechanical Inc.	Manufacture and sales of the simulator rides and its key components
Brogent Creative Inc.	Development and sales of the peripheral products of simulator rides
Brogent Global Inc.	Development and management business of self-operated outlets
Brogent Hong Kong Limited	Reinvestment and trading business
Brogent Rides (Shanghai) Limited	Import and export business
Brogent Creative (Shanghai) Limited	Development and management business of self-operated outlets
Brogent Japan Entertainment Joint-Stock Corporation	Management business and development and sales of the peripheral products of simulator rides in Japan

In 2017, the Company's Operational Highlights of Subsidiaries, please item VIII. Important Notices (2) Operational Highlights of Subsidiaries.

(3) Investment plan for the next year

The Company will review and evaluate our investment plan from a long-term strategic perspective to strengthen the channel-content management strategy and continue to strengthen our global competitiveness.

6. Analysis of risks in recent years up to the publishing date of the annual report

(1) Impact of interest rate and exchange rate changes and inflation on Company's profit and response measures:

(A) Impact of interest rate on Company's profit and response measures

The Company uses its funds conservatively and steadily; the operation-generated funds are stored as time deposits and current deposits. The interests earned in 2016 and 2017 were respectively NT\$7,836 thousand and 7,216 thousand. The bank loan interest expenses were respectively NT\$5,151 thousand and NT\$6,238 thousand. The interest earned and ratio of expenditure as a percentage of operating income and net income before tax was low. Because the Company is increasing its business scale and building the R&D Testing and Experience Center, it is expected that the Company will need more loans in NTD. The Company will remain vigilant at changes in the banks' interest rate and maintain a good relationship with its cooperating banks so that the Company can acquire preferential interest rate to reduce the effects of interest rate variations on the Company operation.

(B) During recent years up to the annual report publishing date, the effects of exchange rate variations on the Company's profit and its future response measures

The business focus of the Company is mobile device software and simulator rides; the downstream customers are major foreign and domestic cellphone manufacturers as well as developers of theme parks. Our mobile device software is priced in USD, and the simulator rides are priced in either NTD or foreign currency depending on the region of sale. Therefore, foreign currency assets are generated. The net foreign exchange gain was NT\$(NT\$6,841) thousand accounting for (0.78%) and (5.28%) of the operating income and net profit margin before tax of 2016 ; he net foreign exchange gain was (NT\$46,404) thousand accounting for (3.06%) and (14.17%) of the operating income and net profit margin before tax of 2017. Because exchange rate changes influence the profits of the Company, the Company's management authorities pay close attention to the exchange rate trends and reinforce the management of risks in exchange rate fluctuations. The corresponding measures adopted are as follows:

① Because of the gradual increase in export sales, the Company attempts to mitigate the effects of

exchange rate changes by setting up a foreign currency savings account to manage foreign currencies. The Company assigns designated personnel from the finance department to sell excess foreign currencies under optimal conditions according to the daily foreign currency balance and monthly fund estimates, to reduce the impact of exchange rate changes on the profit.

②When giving quotes to foreign customers, the business department considers the effects of exchange rate variations on product prices and refers to the prices adjusted according to the changing exchange rates, or negotiates a new price in NTD with the customer, thereby mitigating the effects of exchange rate variations on the profit of the Company.

③Our finance department personnel maintains a close contact with the foreign exchange departments of frequent interacting banks to adequately acquire market information and use such information to forecast the long- and short-term trends of the exchange rate and sell or buy in foreign currencies in a timely manner. Thus, the effects of exchange rate variations on the profitability of the Company can be reduced.

④At the appropriate timing, the Company will have its finance department personnel to review the changes in the foreign exchange market and consider foreign exchange fund requirements and balances to determine whether hedging derivative financial instrument operating strategies should be used in accordance with the Procedure for Processing the Acquisition and Disposal of Assets, such as buying forwards in advance to avert exchange rate risks, thereby minimizing the effects of exchange rate variations on the profit of the Company.

(C) During recent years up to the annual report publishing date, the effects of inflation on the Company's profit and its future response measures:

The Company profits have not experienced material influence from inflation; it is predicted that such effect remains limited on the Company's profits. The Company will continue to monitor the inflation situation and adequately adjust its product prices accordingly.

(2) Policies of engaging in high-risk, high-leverage investments, lending to others, providing endorsement and guarantee, and derivatives transactions, profit/loss analysis, and future response measures:

(A) The Company has always focused on its main business activities and upheld the practical principle of managing a business. Our financial policy is based on the principle of robustness and conservativeness, and thus the Company does not engage in high-risk, high-leveraging investment as well as derivative instrument transactions.

(B) From 2016 to 2017 and up to the annual report publishing date, the Company has not engaged in providing endorsement and guarantee, lending to others, and derivatives transactions. If such

engagements are required in the future, it shall be executed in accordance with the "Operating Procedure for Endorsements and Guarantees," "Operating Procedure for Fund Lending," and "Procedure for Acquisition or Disposal of Assets" and relevant transaction information shall be announced in accordance with laws and regulations.

(3) Future R&D projects and estimated R&D expenditure:

To continuously enhance the Company's competitiveness, the Company has always actively invested in R&D efforts. In 2016 and 2017, it has expended a total of NT\$95,569 thousand and NT\$95,569 thousand in R&D, respectively accounting for 10.84% and 8.58% of the net operating income. It is expected that a total of NT\$153,338 thousand will be expended in R&D in 2018, and the Company's future R&D projects are as follows:

Unit	New products under development
Creativity center	A.Games (1).Interactive game combining motion simulation and technology (2).Sensory interactive game combining augmented reality and related 3D imaging technologies (3).d-Ride interactive shooting game B.Digital content production (including cooperative development) C.Theme planning and renovation design D.Applied equipment combined with wearable device E.Novel projector technical development F.Theme-based peripheral product development
Technical center	A.Group interactive motion theater development B.Novel simulator ride product development C.Platform-controlled technological optimization D.Mechanical design optimization E.Arts design refinement F.Equipment miniaturization

(4) Major changes in government policies and laws at home and broad and the impact on Company finance and business and response measures:

During recent years up to the annual report publishing date, major changes in government policies and laws at home and broad exerted no material effect on Company finance and business. The Company will acquire relevant information in a timely manner and formulate necessary response measures to meet company operation requirements.

(5) Impact of recent technological and market changes during recent years up to the annual report publishing date on the Company's finance and business, and response measures:

The Company has constantly paid attention to technological and market changes and designated personnel to search for information regarding industry-related technologies and trend variations to provide a reference for decision-making at the management level. The information can facilitate adjusting operational strategies and devise response measures. Therefore, there were

no impact of recent technological and market changes on the Company's finance and business.

(6) Impact of corporate image change on risk management and response measures:

Since its inception, the Company actively strengthens its internal management, focusing on the management of its main business activities. In addition, it endeavors to maintain corporate image and compliance with relevant laws and regulations. To date, there have been no changes to the Company's image that would cause risks to company operation. In future, the Company will continue to comply with and implement corporate governance requirement, and consult relevant experts in a timely manner, to reduce the effects of such risk on the Company's finance and business.

(7) Expected benefits and potential risks of merger and acquisition and response measures:

During recent years up to the annual report publishing date, the Company has not undertaken merger and acquisition plans. In the future, when evaluating and implementing relevant plans, the Company shall handle related matters according to laws and regulations and the Company's internal management regulations.

(8) Expected benefits and potential risks of capacity expansion and response measures:

The Company has relocated to the newly constructed R&D Testing Center in January 2013, as a response to prepare for the Company's future expansion, increase its R&D and testing capacities, and raise its operational efficiency requirements. After relocating to the new plant, the Company's image, ability to receive orders, and management efficiency have improved, which is conducive to its business expansion. Because of the currently accepted and expected projects, the Company's R&D testing capacity is inadequate. The Company has started the construction of a R&D Testing and Experience Center in the lower half of 2014 and completed construction in 2016. The R&D Testing and Experience Center not only facilitates determining consumers' entertainment needs regarding simulator rides, but also improves product development, testing and production capacity, increases the capacity to receive more orders and market share, and magnify the gap between the Company and its competitors in competitive advantage. The Company has carefully evaluated the funding requirement for business expansion and properly planned the use of the funds. The Company will raise funds in a capital market to support the construction works. However, if market fund-raising fails, the Company has a low credit limit remaining in bank loans and thus it will apply for construction financing loans from the bank. In addition, the Company's cash flow from operating activities should be enough to support the expansion requirement;

therefore, the Company is not subject to the risk of shortage of funds caused by the construction of the R&D Testing and Experience Center.

(9) Risks associated with over-concentration in purchase or sale and response measures:

(A) Purchases

The Company is a professional manufacturer of simulator rides, purchasing stocks according to the project designs of various simulator rides. The Company also commissions manufacturers to undergo hardware processing. In the past 2 years, purchases exceeding 15% of a single manufacturer were made for precision mechanical products, in addition to the intensive shipments in year 2016. Therefore, the Company is not associated with risks of overly concentrating stock purchases.

(B) Sales

Because simulator rides involve high manufacturing cost, the Company primarily receives income from selling simulator rides since our entry into the simulator ride market. The proportion of sales to simulator ride customers is also demonstrating an increasing trend annually. Following the successful operation of the FlyOver Taiwan project, the Company has attracted the attention of global amusement park and tourist attraction operators, and these operators have visited the Company to engage in negotiations and experience the products themselves. According to customer demand, the Company designs and integrates upstream software and hardware systems and technologies, selling them to downstream operators, including theme parks, museums, shopping malls, and urban experience center. With the increasing popularity and word of mouth of the Company as well as partnering with internationally well-known companies, the Company has expanded from the domestic market to China, North American regions, and Euroasian regions, effectively reducing its reliance on a single customer, thereby mitigating the risk of sales concentration. The upstream industries associated with the simulator ride equipment comprise the hardware section, including precision machinery industry and manufacturers of spherical screens and projectors, and the software section, including wireless embedded control system, spherical projector and playback control systems, and digital contents.

(10) Impact of mass transfer of equity by or change of directors, supervisors, or shareholders holding more than 10% interests on the Company, associated risks and response measures:

During recent years up to the annual report publishing date, there were no mass transfers of equity by or change of directors, supervisors, or shareholders holding more than 10% interests on the Company.

(11) Impact of change of management rights on the Company, associated

risk and response measures:

In 2017 and 2018 up to the annual report publishing date, there were no negative impacts from changes in management rights.

(12) Litigation or non-litigation events

- (A) Disclose the litigation facts, target amount, litigation start date, main parties involved, and current progress regarding concluded or pending litigious, non-litigious, or administrative litigation events, the potential effects of the outcomes on shareholder equity or security prices during the recent two years up to the annual report publishing date: None.
- (B) The outcome of concluded or pending litigious, non-litigious, or administrative litigation events involving the director, supervisor, president, de facto responsible person, major shareholders holding more than 10% interest, or subsidiary of the Company during the recent two years up to the annual report publishing date: None.
- (C) The involvement of the director, supervisor, president, and major shareholders holding more than 10% interest in events regulated in Article 157 of the Securities and Exchange Act during the recent two years up to the annual report publishing date, and the Company's current progress in handling such events: None.

(13) Other significant risks and response measures: None.

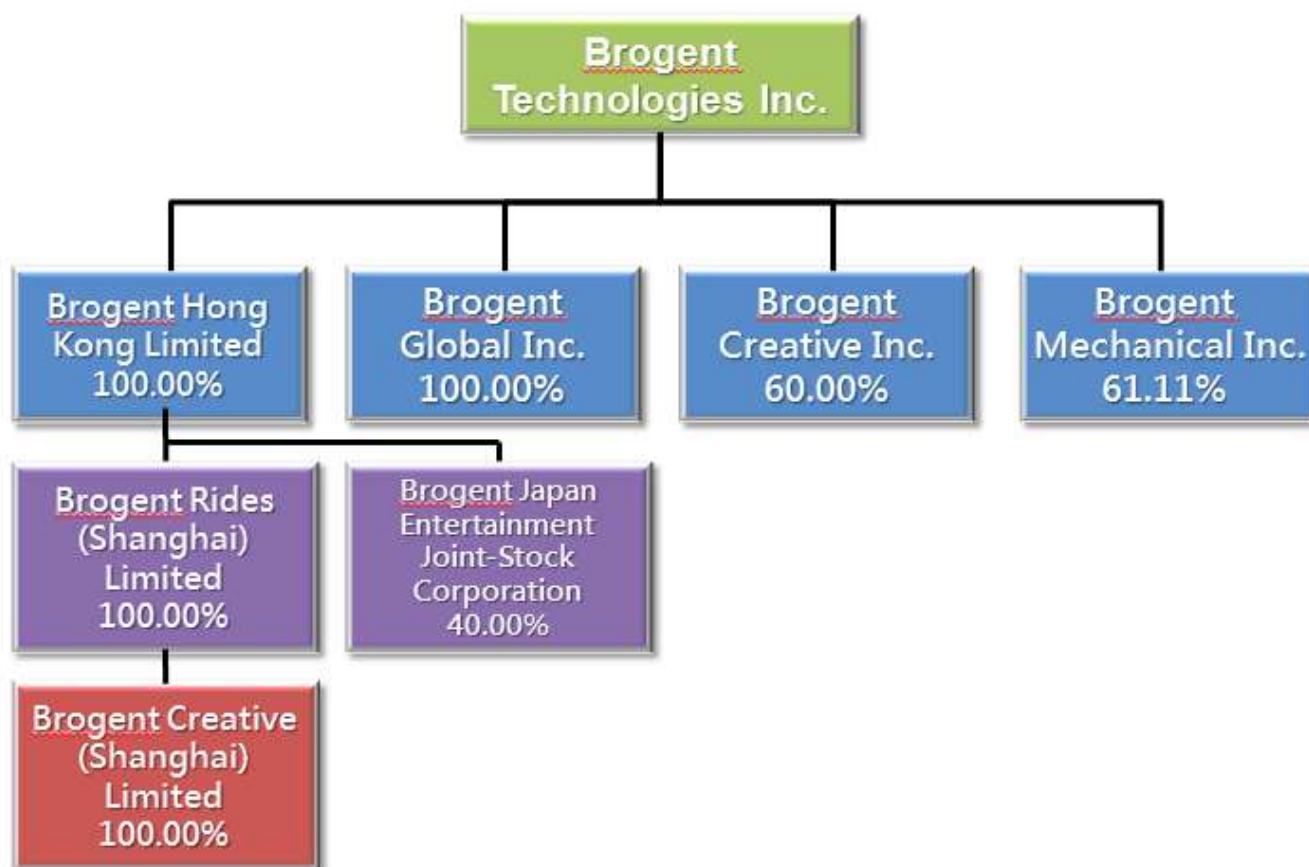

7. Other important events: None.

VIII. Important Notices

1. Profile on affiliates and subsidiaries

(1) Subsidiaries Iperation Report

A. Subsidiary Chart

B. Business Scope of each subsidiary

Investee Company	Date of Establishment	Location	Investment Amount	Business Scope

(3) Consolidated Financial Statements: Please refer to Appendix 3.

2. Private placement of corporate bonds in the past years to the date of the annual report

Item	Private Placement No.1 Date of Issue: February 06, 2015				
Types of Privately Placed Securities	Ordinary shares				
Date and number of shares passed in the shareholders' meeting	On December 19, 2014, the Shareholders' extraordinary meeting passed the private placement of 6,000 ordinary shares, which shall take place once in a year starting from the date of resolution.				
Pricing criteria and rationality	The pricing criterion for the issuance of privately placed ordinary share resolved in the shareholders' meeting on December 19, 2014 was no less than 60% of the reference price. Because the private placement price was less than 80% of the private placement reference price, CPA Shun-Fa Hsu from Deloitte & Touche was requested to produce a private placement price rationality independent expert opinion book on November 1, 2014. This conforms to the regulation of public issuing companies regarding the terms and condition of private placement securities; therefore, the price should be reasonable.				
Method of selecting designated party	Limited to the designated party as regulated under Article 43-6 of the Securities and Exchange Act.				
Necessary reason for private placement	The current private placement is aimed to recruit strategic investors through which the Company can strengthen its customer structure, product combination, and marketing abilities. Compared with publicly placed securities, privately placed securities may not be transferred freely within three years, and such regulation ensures the long-term cooperation between the Company and placement subscribers.

IX. Items of impact of interests of shareholders or stock price

None.

Appendix

Appendix 1 : Statement of Internal Control System

Brogent Technologies Inc.

Statement of Internal Control System

Date: March 12, 2018

Based on the findings of a self-assessment, Brogent Technologies Inc. (Brogent) states the following with regard to its internal control system during the year of 2016 :

1. Brogent's Board of Directors and Management are responsible for establishing, implementing, and maintaining an adequate internal control system. Our internal control is a process designed to provide reasonable assurance over the effectiveness and efficiency of our operations (including profitability, performance, and safeguarding of assets), reliability, timeliness, transparency of our reporting, and compliance with applicable rulings, laws and regulations.
2. An internal control system has inherent limitations. No matter how perfectly designed, an effective internal control system can provide only reasonable assurance of accomplishing its stated objectives. Moreover, the effectiveness of internal control system may be subject to changes due to extenuating circumstances beyond our control. Nevertheless, our internal control system contains self-monitoring mechanisms, and Brogent takes immediate remedial actions in response to any identified deficiencies.
3. Brogent evaluates the design and operating effectiveness of its internal control system based on the criteria provided in the Regulations Governing the Establishment of Internal Control Systems by Public Companies (herein below, the "Regulations"). The criteria adopted by the Regulations identify five key components of managerial internal control: (1) control environment, (2) risk assessment, (3) control activities, (4) information and communication, and (5) monitoring activities.
4. Brogent has evaluated the design and operating effectiveness of its internal control system according to the aforesaid Regulations.
5. Based on the findings of such evaluation, Brogent believes that, on December 31, 2017, it has maintained, in all material respects, an effective internal control system (that includes the supervision and management of our subsidiaries), to provide reasonable assurance over our operational effectiveness and efficiency, reliability, timeliness, transparency of reporting, and compliance with applicable rulings, laws and regulations.
6. This Statement will be an integral part of Brogent's Annual Report for the year 2017 and Prospectus, and will be made public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under Articles 20, 32, 171, and 174 of the Securities and Exchange Law.
7. This Statement has been passed by the Board of Directors in their meeting held on March 12, 2018, with the seven attending directors all affirming the content of this Statement.

Brogent Technologies Inc.

Chairman : Chung-Ming Huang

President : Chih-Hung Ouyang

Appendix 2 : Supervisor's Review Report

Supervisor's Review Report

The Board of Directors has prepared the Company's 2017 Business Report, Financial Statements, and proposal for allocation of profits. The CPA firm of Grant Thornton was retained to audit the Company's Financial Statements and has issued an audit report relating to the Financial Statements. The Business Report, Financial Statements and Profit Allocation Proposal have been reviewed and determined to be correct and accurate by the Audit Committee members of Brogent Technologies Inc. According to Article 219 of the Company Law, we hereby submit the report.

To the 2018 Annual General Meeting

Brogent Technologies Inc.

Supervisor : Yi-Hsiang Huang

Supervisor : Yung-Liang Huang

Supervisor : Ken-Huang Lin

Appendix 3 : Consolidated Financial Statements and Independent Auditors' Report

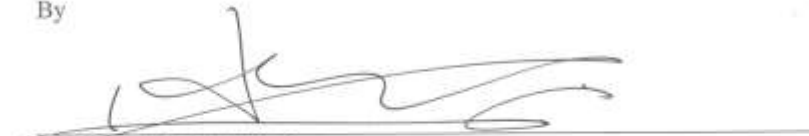

REPRESENTATION LETTER

The entities that are required to be included in the combined financial statements of Brogent Technologies Inc. as of and for the year ended December 31, 2017, under the Criteria Governing the Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises are the same as those included in the consolidated financial statements prepared in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards No.10, "Consolidated Financial Statements." In addition, the information required to be disclosed in the combined financial statements is included in the consolidated financial statements. Consequently, Brogent Technologies Inc. and Subsidiaries do not prepare a separate set of combined financial statements.

Very truly yours,

BROGENT TECHNOLOGIES INC.

By

HUANG, CHUNG-MING

Chairman

March 12, 2018

INDEPENDENT AUDITORS' REPORT

**To the Board of Directors and Shareholders of
Brogent Technologies Inc.**

Opinion

We have audited the accompanying consolidated financial statements of Brogent Technologies Inc. and subsidiaries (the "Group"), which comprise the consolidated balance sheets as of December 31, 2017 and 2016, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, based on our audit and the report of the other independent accountants, (please refer to the paragraph of Other Matters) the accompanying consolidated financial statements present fairly, in all material respects, the consolidated balance sheets of the Group as of December 31, 2017 and 2016, and its consolidated statements of comprehensive income and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission in Taiwan, the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and generally accepted auditing standards in Taiwan, the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with The Norm of Professional Ethics for Certified Public Accountant of Taiwan, the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2017. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Key audit matters in this auditors' report are stated as follows:

Impairment of Accounts Receivable

Whether accounts receivable are impaired is subject to management's subjective judgment by determining the recoverable amount of overdue receivables with credit risk. The carrying amount is reduced through the use of an allowance account, and bad debts are recognized by reference to the assessment of the customers' credit quality. Therefore, we focus on the receivables with significant delays in the collection, and the reasonableness of bad debts recognized by management.

The Group's main business is the design, production and sales of the simulation entertainment equipment. In the past two years, the construction contract revenue accounts for more than 92.79% of the annual net revenue. The carrying amount of accounts receivable as of December 31, 2017 accounts for approximately 10.25% of current assets. The amount is significant and represents the major cash inflows provided by the operating activities of the Group. These involve the identification and subjective judgment for the construction contract, as a result, construction contract revenue and related receivable has been identified as a key audit matter.

Please refer to Note 4(16) to the consolidated financial statements for the related accounting policy. For the carrying amount of accounts receivable, please refer to Note 6(4) to the consolidated financial statements.

In relation to the key audit matter above, our principal audit procedures included to obtain the aging analysis of accounts receivable, calculate the aging intervals, and sample the original vouchers to examine whether the receivables are allocated in the aging analysis table appropriately; sample and deliver confirmation requests; test the collection subsequent to the reporting period to evaluate the reasonableness of allowance for impairment losses of accounts receivable; and obtain management's assessment on allowance for doubtful receivables to examine whether it is in accordance with the Group's accounting policy, and review the completeness and accuracy of related disclosures made by management.

Construction Contracts - Total Cost Estimates and the Recognition of the Stage of Completion

The Group estimates total costs of the construction contract for each project and measures the stage of completion according to the proportion of actual construction working hours to recognize its revenue and costs of the construction contract, which is the Group's main business. Total estimated costs, total estimated working hours required and actual working progress of the contract involve the effective implementation of the project contract and management's subjective judgment, which contain uncertainty for accounting estimates. Considering that the recognition of the Group's construction contract revenue and costs has a significant impact on the consolidated financial statements, this subject has been identified as a key audit matter.

Please refer to Note 4(8) to the consolidated financial statements for the accounting policy in regard to construction contracts. For net amount for the construction contract and the recognition of revenue and costs, please refer to Notes 6(5) and 6(22) of the consolidated financial statements.

In relation to the key audit matter above, our principal audit procedures included evaluation on whether the project construction contract is established in accordance with its relevant internal control operations; obtain the project cost list and project schedule to examine whether total cost and working hours are reasonably estimated based on management's accumulated experience and the current optimal situation; review expected changes of significant estimates; sample the original vouchers to examine whether the actual construction costs incurred have been listed in the appropriate period; confirm whether the actual stage of completion of the project plan has been reviewed by the appropriate authorized personnel and whether the construction schedule has been met; and evaluate the reasonableness of revenue and costs recognized according to the proportion of actual working progress.

Impairment of Property, Plant and Equipment and Intangible Assets

The value of property, plant and equipment and intangible assets is the future recoverable amount generating from related assets which have not been depreciated or amortized under the situation of management's continued operation. Management should evaluate whether there is any indication that assets may be impaired on each balance sheet date. If such indication exists, the recoverable amount of the asset should be estimated. When it is not possible to estimate the recoverable amount of an individual asset, management should estimate the recoverable amount of the cash-generating unit to which the asset belongs. Whether assets have been impaired and the calculation of the amount of the impairment loss involve multiple assumptions and accounting estimates, it is important to verify that the Group is in compliance with IAS 36 and that the carrying amount of above assets does not exceed the recoverable amount.

Please refer to Notes 4(10), (11) and (12) of the consolidated financial statements for related accounting policies. For the carrying amount of related assets, please refer to Notes 6(10) and (11) of the consolidated financial statements.

In relation to the key audit matter mentioned above, our principal audit procedures included to understand the design and implementation of the method of assessing impairment and its relevant control system; obtain the impairment assessment made by management on the basis of the cash-generating unit, and verify the reasonableness of the identification of the impairment as well as the appropriateness of assumptions used by management in relation to cash-generating unit division, cash flow forecast, discount rate, etc.

Other Matters - Individual Financial Statements

We did not audit the financial statements of a wholly-owned consolidated subsidiary whose statements are based solely on the reports of other auditors that is included in the consolidated financial statements. Total assets of the subsidiary amounted to NT\$350,275 thousand, which constituting 10.08% of consolidated total assets as of December 31, 2017, and operating income was NT\$129,964 thousand, which constituting 8.58% of consolidated total operating income for the year then ended.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, IFRS, IAS, IFRIC, and SIC endorsed and issued into effect by the Financial Supervisory Commission in Taiwan, the Republic of China, and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including supervisors, are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee, that an audit conducted in accordance with generally accepted auditing standards of Taiwan, the Republic of China, will detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, are expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with generally accepted auditing standards of Taiwan, the Republic of China, we have exercised professional judgment and maintained professional skepticism throughout the audit. In addition, we also:

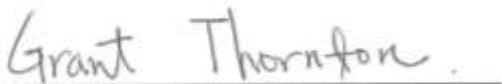

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks; and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than those resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management assessment on Group's ability to continue as a going concern. Based on the audit evidence obtained, determine whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures; and whether the consolidated financial statements truly capture all underlying transactions and events in a manner that achieve the fair presentation of the Group's financial performance and operation.

6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those in charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those in charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with those in charged with governance with all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2017 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Grant Thornton

BROGENT TECHNOLOGIES INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2017 AND 2016

(Amounts in Thousands of New Taiwan Dollars, Unless Specified Otherwise)

1. GENERAL

Brogent Technologies Inc. (the “Brogent” or the “Company”) was incorporated under the Company Law of Taiwan, the Republic of China (R.O.C.) in October, 2001. On December 18, 2012, the Company’s shares were traded on the Taipei Exchange (TPEX). The Company and its subsidiaries (collectively as the “Group”) are primarily engaged in the research, development, design, production and sales of the simulation entertainment equipment and its key components and peripheral products, embedded/mobile software, streaming media/video, real-time rendering (3D above), interactive multimedia network, and multi-screen seamless integration systems.

The address of the Group’s registered office and principal place of business is No.9, Fuxing 4th Rd., Qianzhen Dist., Kaohsiung City, Taiwan.

2. THE AUTHORIZATION OF FINANCIAL STATEMENTS

The accompanying consolidated financial statements were approved and authorized for issue by the Board of Directors on March 12, 2018.

3. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS

(1) Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, “IFRSs”) endorsed and issued into effect by the Financial Supervisory Commission (FSC)

The initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs endorsed and issued into effect by the FSC did not have a significant effect on the Group’s accounting policies.

Amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers

The amendments include additions of several accounting items and requirements for disclosures of impairment of non-financial assets as a consequence of the IFRSs endorsed by the FSC for application starting from 2017. In addition, as a result of the post implementation review of IFRSs in Taiwan, the amendments also include emphasis on certain recognition and measurement considerations and add requirements for disclosures of related party

transactions and goodwill.

The amendments stipulate that other companies or institutions of which the chairman of the board of directors or president serves as the chairman of the board of directors or the president, or is the spouse or second immediate family of the chairman of the board of directors or president of the Group, are deemed to have a substantive related party relationship, unless it can be demonstrated that no control, joint control, or significant influence exists. Furthermore, the amendments require the disclosure of the names of the related parties and the relationship with whom the Group has significant transaction. If the transaction or balance with a specific related party is 10% or more of the Group's respective total transaction or balance, such transaction should be separately disclosed by the name of each related party.

The amendments also require additional disclosure if there is a significant difference between the actual operation after business combination and the expected benefit on acquisition date.

When the amendments are applied retrospectively starting on January 1, 2017, the disclosure of specific related party transactions or balance that are more than 10% of Group's respective total transaction or balance is further enhanced and disclosed in Note 7.

(2) The IFRSs endorsed by FSC with effective date starting 2018

<u>New, Revised or Amended Standards and Interpretations</u>	<u>Effective Date Issued by IASB</u>
Annual Improvements to IFRSs 2014-2016 Cycle	
Amendment to IFRS 12	January 1, 2017
Amendment to IAS 28	January 1, 2018
Amendment to IFRS 2 "Classification and Measurement of Share-based Payment Transactions"	January 1, 2018
IFRS 9 "Financial Instruments"	January 1, 2018
Amendments to IFRS 9 and IFRS 7 "Mandatory Effective Date of IFRS 9 and Transition Disclosure"	January 1, 2018
IFRS 15 "Revenue from Contracts with Customers"	January 1, 2018
Amendment to IFRS 15 "Clarifications to IFRS 15"	January 1, 2018
Amendment to IAS 7 "Disclosure Initiative"	January 1, 2017
Amendment to IAS 12 "Recognition of Deferred Tax Assets for Unrealized Losses"	January 1, 2017
Amendment to IAS 40 "Transfers of Investment Property"	January 1, 2018
IFRIC 22 "Foreign Currency Transactions and Advance Consideration"	January 1, 2018

Except for the following items, the Group believes that the adoption of aforementioned standards or interpretations will not have a significant effect on the Group's accounting policies.

A. IFRS 9 “Financial Instruments”

With regards to financial assets, all recognized financial assets that are within the scope of IAS 39 “Financial Instruments: Recognition and Measurement” are subsequently measured at amortized cost or fair value. Under IFRS 9, the requirement for the classification of financial assets is stated below.

For the Group’s debt instruments that have contractual cash flows use solely for the purpose of principal and interest repayments, their classification and measurement are as follows:

- (a) If the objective of the Group’s business model is to hold the financial asset for the contractual cash flows purpose, such assets are measured at the amortized cost. Interest revenue should be recognized in profit or loss by using the effective interest method; and assessment on financial asset impairment should be performed on a continuously basis. Impairment loss or reversal of impairment loss, if any, should be recognized in profit and loss.
- (b) If the objective of the Group’s business model is to hold the financial asset for the purpose of remitting contractual cash flows payments and to sell the financial assets, such assets are measured at fair value through other comprehensive income and should be assessed for impairment on a continuously basis. Interest revenue should be recognized in profit or loss by using the effective interest method. Any gain or loss on a financial asset measured at fair value through other comprehensive income should be recognized in other comprehensive income, except for gains or losses result from impairment or due to foreign exchange fluctuations. When such financial asset is derecognized or reclassified, the cumulative gains or losses previously recognized in other comprehensive income is reclassified from equity to profit or loss.

The other financial assets which do not meet the aforementioned criteria should be measured at the fair value through profit or loss. However, the Group may irrevocably designate an investment in equity instruments that is not held for trading as measured at fair value through other comprehensive income. All relevant gains and losses shall be recognized in other comprehensive income, except for dividends which are recognized in profit or loss. No subsequent impairment assessment is required, and the cumulative gain or loss previously recognized in other comprehensive income cannot be reclassified from equity to profit or loss.

Based on the facts and circumstances of the financial assets held on December 31, 2017 and as of the current day, the Group initially estimated that the classification and measurement of the following financial assets will be changed by applying IFRS 9:

- (a) Non-publicly traded equity instruments classified as financial assets carried at cost should be measured at fair value in accordance with IFRS 9.
- (b) Financial assets classified as debt investments with no active market and held-to-maturity financial assets are classified as measured at amortized cost under

IFRS 9 as these investments are held within a business model whose objective is solely for contractual cash flows purpose.

IFRS 9 adds a new expected loss impairment model to measure the impairment of financial assets. A loss allowance for expected credit losses should be recognized for financial assets measured at amortized cost and financial assets mandatorily measured at fair value through other comprehensive income. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Group should measure the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. If the credit risk on a financial instrument has increased significantly since initial recognition and is not deemed to be a low credit risk, the Group should measure the loss allowance for that financial instrument at an amount equal to its lifetime expected credit losses. The Group should always measure the loss allowance at an amount equal to lifetime expected credit losses for trade receivables.

For purchased or originated credit-impaired financial assets, the Group takes into account the expected credit losses on initial recognition in calculating the credit-adjusted effective interest rate. Subsequently, any changes in expected losses are recognized as a loss allowance with a corresponding gain or loss recognized in profit or loss

Preliminary assessment of the Group's assets of accounts receivable and related construction contracts will be performed by applying a simplified approach to expected credit losses in calculating allowance for losses. The Group chose not to re-compile the 2017 annual information when applying the classification, measurement and impairment provisions of the International IFRS 9. The cumulative impact of the first-time projects will be recognized at the date of initial application.

The retroactive application of IFRS 9 financial assets, measurement and impairment provisions reveals the following classification and adjustment: :

Assets and Equity Effect	Carrying Amount as of December 31, 2017 (IAS 39)	Adjustments Arising from Initial Application	Retained Earnings Effect on January 1, 2018	Carrying Amount before adjusting as of January 1, 2018 (IFRS 9)
Debt investments with no active market-current	\$196,066	(\$196,066)	\$-	\$-
Financial assets at amortized cost-current	-	196,066	-	196,066
Held-to-maturity financial assets- noncurrent	35,570	(35,570)	-	-
Financial assets at amortized cost-noncurrent	-	35,570	-	35,570
Financial assets carried at	17,856	(17,856)	-	-

cost - noncurrent				
Financial assets at fair				
value through profit or				
loss-noncurrent	-	17,856	(2,248)	15,608
Total effect on assets	<u>\$249,492</u>	<u>\$-</u>	<u>(\$2,248)</u>	<u>\$247,244</u>

The main changes in hedge accounting amended the application requirements for hedge accounting to better reflect the Group’s risk management activities. Compared with IAS 39, the main changes include: (1) enhancing types of transactions eligible for hedge accounting, specifically broadening the risks eligible for hedge accounting of non-financial items; (2) changing the way derivative instruments are accounted for to reduce profit or loss volatility; and (3) replacing retrospective effectiveness assessment with the principle of economic relationship between the hedging instrument and the hedged item.

B. IFRS 15, “Revenue from Contracts with Customers” and related amendment

IFRS 15 establishes principles for recognizing revenue that apply to all contracts with customers, which has supersede IAS 18, “Revenue”, IAS 11, “Construction Contracts”, and other revenue-related interpretations.

When applying IFRS 15, the Group shall recognize revenue by applying the following steps:

- (a) Identify the contract with the customer;
- (b) Identify the performance obligations in the contract;
- (c) Determine the transaction price;
- (d) Allocate the transaction price to the performance obligations in the contracts; and
- (e) Recognize revenue when the entity satisfies a performance obligation.

The Group applies IFRS 15 and assesses the facts and circumstances of the contracts that were not completed on December 31, 2017. Noting IFRS 15 has not been applied retrospectively nor has it had any cumulative effects for the initial application of the assessment of the recognition, measurement and presentation of revenue resulting from 2018’s customer contracts.

C. IFRIC 22 “Foreign Currency Transactions and Advance Consideration”

IAS 21 stipulated that a foreign currency transaction shall be recorded initial in the functional currency by applying to the foreign currency amount at the spot exchange rate on the date of the transaction. IFRIC 22 further explains that the date of the transaction is the date on which an entity recognizes a non-monetary asset or non-monetary liability from payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the entity shall determine the date of the transaction for each payment

or receipt of advance consideration.

Except for the aforementioned impact, as of the date that the accompanying consolidated financial statements were authorized for issue, the Group evaluates that there are no significant effect on its financial position and financial performance as a result of the initial adoption of the other standards or interpretations.

(3) The IFRSs issued by IASB but not yet endorsed and issued into effect by FSC

New, Revised or Amended Standards and Interpretations	Effective Date Issued by IASB
Annual Improvements to IFRSs 2015–2017 Cycle	January 1, 2019
Amendments to IFRS 9 “Prepayment Features with Negative Compensation”	January 1, 2019
Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between an Investor and its Associate or Joint Venture”	To be determined by IASB
IFRS 16 “Leases”	January 1, 2019
IFRS 17 “Insurance Contracts”	January 1, 2021
Amendments to IAS 28 “Long-term Interests in Associates and Joint Ventures”	January 1, 2019
IFRIC 23 “Uncertainty over Income Tax Treatments”	January 1, 2019

Except for the following items, the Group believes that the adoption of aforementioned standards or interpretations will not have a significant effect on the Group’s accounting policies.

A. IFRS 16 “Leases”

IFRS 16 sets out the accounting standards for leases that will supersede IAS 17 and a number of related interpretations.

Under IFRS 16, if the Group is a lessee, it shall recognize right-of-use assets and lease liabilities for all leases on the consolidated balance sheets except for low-value and short-term leases. The Group may elect to apply the accounting method similar to the accounting for operating lease under IAS 17 to the low-value and short-term leases. On the consolidated statements of comprehensive income, the Company should present the depreciation expense charged on the right-of-use asset separately from interest expense accrued on the lease liability; interest is computed by using effective interest method. On the consolidated statements of cash flows, cash payments for both the principal and interest portion of the lease liability are classified within financing activities.

When IFRS 16 becomes effective, it is expected that there will be no significant impact on the accounting treatment of the Group as lessor. For leases that are lessees, the Group

may elect to apply this Standard either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of the initial application of this Standard recognized at the date of initial application. The Group chooses to retrospectively with the cumulative effect of the initial application of this Standard recognized at the date of initial application, and it applies consistently to all leases of the Group that are lessees, and does not retroactively re-compile comparative information from previous reporting periods. For leases previously classified as operating leases, the lease liability is measured based on the present value of the remaining lease payments (the discounted borrower's borrowing interest rate on the initial application date), and the right-of-use asset is measured by the amount of the lease liability. There is no material impact on the rights at the date of initial application.

Except for the aforementioned impact, as of the date the accompanying consolidated financial statements were authorized for issue, the Group continues in evaluating the impact on its financial position and financial performance as a result of the initial adoption of the other standards or interpretations. The related impact will be disclosed when the Group completes the evaluation.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(1) **Statement of Compliance**

The accompanying consolidated financial statements have been prepared in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations endorsed and issued into effect by the FSC.

(2) **Basis of Preparation**

The accompanying consolidated financial statements have been prepared on the historical cost basis except for financial instruments measured at fair value and defined benefit assets or liabilities. Historical cost is generally based on the fair value of the consideration given in exchange for the assets.

(3) **Basis of Consolidation**

A. **Basis for preparation of consolidated financial statements**

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries). Control is achieved where Brogent has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Subsidiaries are fully consolidated from the date on which control is transferred to the Group; and they are de-consolidated from the date when control ceases.

Total comprehensive income of subsidiaries is attributed to the shareholders of the parent and to the noncontrolling interests even if this results in a deficit balance in

noncontrolling interests. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with those used by the Company.

All significant intra-group transactions, balances, income and expenses are eliminated in full upon consolidation.

Changes in the Company's ownership interests in subsidiaries that do not result in the Company losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Company's interests and the noncontrolling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount of which the noncontrolling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to shareholders of the parent.

When the Group loses control of a subsidiary, a gain or loss is recognized in profit or loss, and is calculated as the difference of: (a) the aggregate fair value of consideration received and the fair value of any retained interest at the date when control is lost; and (b) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any noncontrolling interest. The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the cost on initial recognition of an investment in an associate. The Group shall account for all amounts recognized in other comprehensive income in relation to the subsidiary on the same basis as if the Group had directly disposed of the related assets and liabilities. That is, when the Group loses control of a subsidiary, all gains or losses previously recognized in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss.

B. Subsidiaries included in the consolidated financial statements

The detail information of the subsidiaries at the end of reporting period was as follows:

Name of Investor	Name of Investee	Business Scope	Location	Percentage of Ownership		Note
				December 31, 2017	December 31, 2016	
Brogent Technologies Inc.	Brogent Mechanical Inc.	Manufacture and sales of the simulator rides and related key components	May, 2015 Taoyuan City	61.11%	61.11%	1
	Brogent Creative Inc.	Development and sales of simulator rides and related peripheral products	April, 2015 Kaohsiung City	60.00%	60.00%	
	Brogent Hong Kong Limited	Reinvestment and trading business	June, 2015 Hong Kong	100%	100%	

	Brogent Global Inc.	Development and management business of self-operated outlets	September, 2015 Kaohsiung City	100%	100%
Brogent Hong Kong Limited	Brogent Rides (Shanghai) Limited	Import and export business	July, 2015 Shanghai	100%	100%
Brogent Rides (Shanghai) Limited	Brogent Creative (Shanghai) Limited	Development and management business of self-operated outlets	September, 2015 Shanghai	100%	100%

Note 1: The 2017 financial statements of Brogent Mechanical Inc. is audited by the other auditors.

C. Subsidiaries not included in the consolidated financial statements: None.

(4) Foreign Currency Translation

Foreign currency transactions of each of the Group's entities are expressed in the functional currency. Monetary assets and liabilities denominated in foreign currencies are recognized using the exchange rates at the dates of the transactions. Exchange differences arise when monetary items are settled or when monetary items are translated at rates different from those at which they were translated on initial recognition during the period or in previous financial statements shall be recognized in profit or loss in the period in which they arise.

Financial statements for all foreign subsidiaries are translated into the functional currency as follows: assets and liabilities are translated using the closing exchange rate at the balance sheet date; income and expenses are translated at the average exchange rates of that period; opening retained earnings carryforward from prior period are translated using the historical exchange rates; dividends are translated using the exchange rates at the declaration date; and items in other comprehensive income are translated using the rate at the balance sheet date. Cumulative amount of the exchange differences relating to a suspending foreign operation are recognized in other comprehensive income and accumulated in a separate component of equity. Such amount is reclassified from equity to profit or loss when the gain or loss on disposal is recognized.

When a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange component of that gain or loss shall be recognized in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognized in profit or loss, any exchange component of that gain or loss shall be recognized in profit or loss.

(5) Classification of Current and Noncurrent Assets and Liabilities

Current assets include: (a) unrestricted cash or cash equivalents; (b) assets held mainly for trading purposes; (c) assets that are expected to be realized within twelve months from the balance sheet date; and (d) assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle. Current liabilities include: (a) liabilities that are to be paid off within twelve months from the balance sheet date; and (b) liabilities that are expected to be paid off within the normal operating cycle. Assets and liabilities that are not classified as current are noncurrent assets and liabilities, respectively.

As the operating cycle for construction contracts usually exceeds one year, the Group uses the operating cycle as its criteria for classifying current and noncurrent assets and liabilities related to construction contracts. For other assets and liabilities, the criterion is one year.

(6) Cash Equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) **Inventories**

Inventories mainly include materials of simulation entertainment equipment. Inventories are accounted for on a perpetual basis, and are stated at cost at the time of acquisition or initial measurement. Cost is determined using the weighted average method. Except for allowance for obsolescence, inventories are subsequently measured at the lower of cost and net realizable value. The item by item approach is used in applying the lower of cost and net realizable value. Write-downs of inventories and any reversal of write-downs are recorded as cost of goods sold for the period.

(8) **Construction Contracts**

If the outcome of a construction contract can be estimated reliably and it is probable that this contract would make a profit, contract revenue and costs should be recognized by reference to the stage of completion of the contract activity at the end of the reporting period. The stage of completion of a contract is measured by the percentage-of-completion method. Contract revenue should include the revenue arising from variations in contract work, claims and incentive payments as long as it is probable that they will result in revenue and can be measured reliably.

If the outcome of a construction contract cannot be estimated reliably, contract revenue should be recognized only to the extent of which the related contract costs incurred are recognized

If it is probable that total contract costs will exceed total contract revenue, the expected loss should be recognized as an expense immediately.

The excess of the cumulative costs incurred plus recognized profits (less recognized losses) over the progress billings on each construction contract is presented as an asset as “Construction receipts receivable”. While, the excess of the progress billings over the cumulative costs incurred plus recognized profits (less recognized losses) on each construction contract is presented as a liability as “Construction receipts payable”.

(9) **Investments Accounted for Using Equity Method**

Investments accounted for using the equity method include investments in associates and interests in joint ventures.

An associate is an entity over which the Group has significant influence. It is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but does not control or joint control over those policies.

A joint venture is a joint arrangement established between the Group and other parties to have joint control over the net assets of the joint arrangement. The operating results and assets and liabilities of associates and joint venture are incorporated in these consolidated financial statements using the equity method of accounting. Under the equity method, an investment in an associate or a joint venture is initially recognized in the consolidated

statement of financial position at cost and adjusted thereafter to recognize the Group's share of profit or loss and other comprehensive income of the associate and joint venture as well as the distribution received. The Group also recognizes its share in the changes in the equities of associates and joint venture.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an associate or a joint venture recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount (higher of the value in use or the fair value less costs to sell) with its carrying amount. Impairment loss is recognized when the recoverable amount exceeds the carrying amount of the investment. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date when the Group ceases to have significant influence over an associate. When the Group retains an interest in the former associate, the Group measures the retained interest at fair value. The difference between the carrying amount of the associate at the date the equity method was discontinued and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate is included in the determination of the gain or loss on disposal of the associate. In addition, the Group shall account for all amounts recognized in other comprehensive income in relation to that associate on the same basis as would be required if the associate had directly disposed of the related assets or liabilities. If the Group's ownership interest in an associate is reduced as a result of disposal, but the investment continues to be an associate, the Group should reclassify only a proportionate amount of the gain or loss previously recognized in other comprehensive income to profit or loss.

When the Group subscribes to additional shares in an associate or a joint venture at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Group's proportionate interest in the net assets of the associate or joint venture. The Group records such a difference as an adjustment to investments with the corresponding amount charged or credited to capital surplus. If the Group's ownership interest is reduced due to the additional subscription to the shares of associate or joint venture by other investors, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate or joint venture shall be reclassified to profit or loss on the same basis as would be required if the associate or joint venture had directly disposed of the related assets or liabilities.

When a consolidated entity transacts with an associate or a joint venture, profits and losses resulting from the transactions with the associate or joint venture are recognized in the

Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not owned by the Group.

(10) Property, Plant and Equipment

Property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Costs include any incremental costs that are directly attributable to the construction or acquisition of property, plant and equipment.

Depreciation is computed using the straight-line method over the following estimated useful lives: buildings – 5 to 50 years; machinery and equipment – 3 to 5 years; transportation equipment – 5 years; office equipment – 3 to 5 years; and other equipment – 3 to 15 years. The estimated useful lives, residual values and depreciation method are reviewed at the end of each financial year, with the effect of any changes in estimates accounted for on a prospective basis.

Any gain or loss arising on the disposal or retirement of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset; and is recognized in profit or loss.

(11) Intangible Assets

Intangible assets are carried at cost less accumulated amortization and accumulated impairment losses. Cost is the amount of cash or cash equivalents paid or the fair value of other consideration given to acquire an asset at the time of its acquisition or construction.

Computer software and franchise is amortized on an average basis over its estimated useful life of 3 years. Patents is amortized on an average basis over its estimated useful life of 20 years. The exchange of simulation entertainment equipment for profit-sharing right of ticket sales is amortized on an average basis over its estimated useful life of 5 to 10 years. If the fair value of the asset received cannot be measured reliably, its cost is measured at the carrying amount of the asset given up.

The estimated useful life and amortization method are reviewed at the end of each financial year, with the effect of any changes in estimate being accounted for on a prospective basis.

(12) Impairment of Tangible and Intangible Assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest

group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate which reflects the current market assessments of (a) the time value of money, and (b) the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

When an impairment loss is subsequently reversed, the carrying amount of the asset or a cash-generating unit is increased to the revised estimate of its recoverable amount; however, the increased carrying amount shall not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. Any reversal of an impairment loss is recognized immediately in profit or loss.

(13) Provisions

Provisions are recognized when: (a) the Group has a present legal or constructive obligation as a result of a past event; (b) it is probable that the Group will be required to settle the obligation; and (c) a reliable estimate can be made on the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

(14) Employee Benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expenses in that period when service is rendered.

For defined contribution plan, payments to the benefit plan are recognized as an expense when the employees have rendered service that entitling them to the contribution. For defined benefit plan, the cost of providing benefit is recognized based on actuarial calculations.

Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive upon retirement for services provided to the Group in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is

calculated annually by independent actuaries using the projected unit credit method. The discount rate is referencing to government bonds interest rates (at the balance sheet date).

Remeasurement under a defined benefit plan recognized in other comprehensive income is reflected immediately in retained earnings. Past service costs are recognized immediately in profit or loss.

(15) Financial Instruments

Financial assets and liabilities shall be recognized when the Group becomes a party to the contractual provisions of the instruments.

Financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

(16) Financial Assets

Ordinary purchases or sales of financial assets are recognized and derecognized on a settlement date basis.

Financial assets are classified as “Financial assets at fair value through profit or loss,” “Held-to-maturity financial assets,” “Financial assets carried at cost,” “Debt investments with no active market,” or “Loans and receivables” by nature.

A. Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are stated at fair value at the end of the reporting period, with any gains or losses arising on remeasurement recognized in profit or loss. Such gains or losses include any dividends and interest received.

B. Held-to-maturity financial assets

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity dates, and it is probable that the Group has the positive intent and ability to hold to maturity. Subsequent to initial recognition, held-to-maturity financial assets are measured at amortized cost using the effective interest method less any impairment.

C. Financial assets carried at cost

Financial assets carried at cost are investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured; financial assets are measured at cost, derivatives are linked to and must be settled by delivery of such unquoted equity instruments; and the Group do not have significant influence over these financial assets. Cost of investments sold are determined using the weighted moving-average method. In a subsequent period, if there is objective evidence that an impairment loss has been incurred, the amount of the impairment loss is

recognized. Such impairment losses shall not be reversed.

D. Debt investments with no active market

Debt investments with no active market are bond investments with fixed or determinable payments that are not quoted in an active market. Such financial assets are initially recognized at cost, and subsequently measured at amortized cost using the effective interest method, less any impairment.

E. Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Financial assets, other than (a) financial assets at fair value through profit or loss; (b) available-for-sale financial assets; (c) financial assets of which the holder may not recover substantially all of its initial investment for reasons other than credit deterioration, are measured at amortized cost using the effective interest method less any impairment, except for those loans and receivables with immaterial discounted effect. The effective interest rate calculation includes discounts or premiums and transaction costs.

F. Impairment of financial assets

Financial assets, other than those carried at fair value through profit or loss, are assessed for indicators of impairment at the end of the reporting period. Those financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, their estimated future cash flows have been negatively affected.

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows (including collateral and guarantee) discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of loans and receivables, where the carrying amount is reduced through the use of an allowance account. When loans and receivables are considered uncollectible, the allowance account is written off. Recoveries of amounts previously written off are credited against the allowance account when loans and receivables are subsequently collected.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the financial assets at the date the impairment loss is reversed does not exceed the amortized cost were the impairment loss had not been recognized.

G. Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the financial asset expire, or when it transfers the financial asset and

substantially all the risks and rewards of ownership of the financial asset to another entity.

When derecognition a financial asset, the difference between the financial asset's carrying amount and the consideration received (or receivable) is recognized in profit or loss.

(17) Financial Liabilities and Equity Instruments

A. Classification as debt or equity

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with 1) the substance of the contractual arrangements, and 2) the definitions of a financial liability and an equity instrument.

B. Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. Equity instruments issued by the Group are recognized at the balance of proceeds received, net of direct issue costs.

C. Financial liabilities

Financial liabilities other than those held for trading purposes and designated as at fair value through profit or loss are subsequently measured at amortized cost at the end of each reporting period.

Financial liabilities at fair value through profit or loss are stated at fair value at the end of the reporting period, with any gains or losses arising on remeasurement being recognized in profit or loss.

D. Derecognition of financial liabilities

The Group derecognizes financial liabilities only when the obligations are discharged, cancelled, or expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid (or payable) is recognized in profit or loss.

(18) Share-based Payment

For the equity-settled share-based payment arrangements, the equity instruments are measured at the fair value on the grant date, and are recognized as compensation cost over the vesting period with a corresponding adjustment to equity. The fair value of the equity instruments is measured by an appropriate pricing model.

(19) Employees' Compensation and Directors' and Supervisors' Remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expenses and liabilities, provided that such recognition is required under legal obligation or constructive obligation and those amounts can be estimated reliably. However, if the accrued amounts for employees' compensation and directors' and supervisors' remuneration are

different from the actual distributed amounts as resolved subsequently by the board of directors, the differences shall be recognized based on the accounting for changes in estimates.

(20) Income Tax

Income tax expense (benefit) for the period comprises current and deferred tax.

A. Current tax

The tax expense for the period comprises current and deferred tax. Income tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.

The current tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Group operates and generates taxable income. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

B. Deferred tax

Deferred tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is determined using tax rate (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available to offset against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.

C. Others

Income tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity, where the tax is also recognized in other comprehensive income or directly in equity, respectively.

Research and development expenses are recognized as income tax credits, which lead to a tax privilege for the Group.

(21) Government Grants

Government grants are recognized at the fair value only when there is reasonable assurance that (a) the Group will comply with any conditions attached to the grants and (b) the grants will be received.

Government grants related to income should be recognized as revenue in a rational and

systematic way over the periods when the related costs are expected to be incurred. However, the government grants that are not yet realized should be presented as deferred revenue. If no rational evaluating approach is available to recognize such government grants, then the amount of government grants should be recognized in full when received.

Government grants related to assets should be recognized as deferred revenue. If the government grants are related to depreciable assets, they should be recognized as revenue over the useful lives in proportions to which depreciation expenses on those assets are charged. If the government grants are not related to depreciable assets and if the government grants require certain obligations to be fulfilled, the enterprise should recognize such government grants over the periods in proportions to which the related costs are incurred by the enterprise to fulfill these obligations.

If the government grants are intended to compensate for expenses or losses that have already incurred, or are intended to give immediate financial support with no future related costs, the amount of government grants should be recognized in full when there is reasonable assurance that the grants will be received.

(22) Revenue and Expense Recognition

Income and expenses are recognized in the consolidated statements of comprehensive income when an increase or decrease in economic benefits can be measured reliably. Income includes revenues and gains, while expenses include costs, losses and other expenses. If the expenditures cannot generate future economic benefits, or if the future economic benefits do not meet the criteria for recognition as an asset, the expenditures should be recognized as expenses in the consolidated statements of comprehensive income.

Revenues is recognized when it is realized or realizable and earned, that is, when the earning process is complete or virtually complete. Expense is recognized when it is incurred.

The Group provides customized software development services. When the outcome of the transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction shall be recognized by reference to the stage of completion of the transaction at the end of the reporting period. When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue shall be recognized only to the extent of the costs incurred that are recoverable. If it is not probable that the costs incurred will be recovered, revenue is not recognized and the costs incurred are recognized as expenses.

If the outcome of the transaction involving the rendering of services is estimated to bear a loss, the loss should be recognized immediately. However, if the loss is estimated to be smaller in future years, the difference should be reversed and recognized as a gain in that year.

(23) Earnings Per Share

Basic earnings per share are calculated as net income divided by the weighted average number of common shares outstanding. Basic earnings per share are retrospectively adjusted

to reflect the effect of the capitalization of stock dividends from capital reserve and retained earnings. For the purpose of calculating the diluted earnings per share, potentially dilutive common shares are deemed to have been converted into common stock at the beginning of the period, and the effect on the net income attributable to additional common shares outstanding is considered accordingly.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION AND UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgments in applying International Financial Reporting Standards endorsed by the FSC and make critical assumptions and estimates concerning future events. Judgments and estimates are continually evaluated and adjusted based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The following are information on key assumptions about the future and other key sources of estimation and uncertainty at the end of the reporting period. Such assumptions and estimates may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

(1) Allowance for bad debts on receivables

The Group assesses the recoverable receivables and estimates its allowance for bad debts based on the credit quality of customers, the collectivity of accounts, and the past history on actual bad debt incurred. When there is an indication for potential uncollectability, an allowance for bad debts will be made. The identification of allowance for doubtful debts requires an estimate. If the expected future cash flow is differs from the original estimate, the difference will create a change in the carrying amount of accounts receivable and bad debts expenses for the year when change in estimate is made.

(2) Valuation of Inventory

Inventories are stated at the lower of cost or net realizable value, and the Group uses judgments and estimates to determine the net realizable value of inventory at the end of the reporting period.

Due to the rapid technological changes, the Group estimates the net realizable value of inventory for obsolescence and unmarketable items at the end of each reporting period. Impairment is recognized when cost of inventories is lower than its net realizable value. The net realizable value of the inventory is mainly determined based on assumptions of future demand within a specific time horizon.

(3) Impairment of Tangible and Intangible Assets

In the process of evaluating the potential impairment of tangible and intangible assets other than goodwill, the Group is required to make subjective judgments in determining the independent cash flows, useful lives, expected future revenue and expenses related to the

specific asset groups with the consideration of the nature of industry. Any changes in these estimates based on changed in economic conditions or business strategies could result in significant impairment charges or reversal in future years.

(4) **Realization of Deferred Income Tax Assets**

Deferred tax assets are recognized to the extent that it is probable that future taxable profits will be available against which those deferred tax assets can be utilized. Assessment of the realization of the deferred tax assets requires the Group's subjective judgments and estimates, including the future revenue growth and profitability, tax holidays, the amount of tax credits can be utilized and feasible tax planning strategies. Any changes in the global economic environment, the industry trends and relevant laws and regulations could result in significant adjustments to the deferred tax assets.

(5) **Accrued Pension Liabilities**

When calculating the present value of defined benefit obligation, the Group should use judgments and estimates to determine relevant actuarial assumptions at the end of the reporting period. Actuarial assumptions comprise the discount rate and expected rate of return on plan assets. Changes in any actuarial assumptions may have a material impact on the amount of defined benefit obligation.

(6) **Share-based Payment**

Equity-settled share-based payments are measured at the fair value of equity instruments in accordance with the given terms to determine the best pricing model. Parameters used for the estimation of the pricing model including stock options' expected duration, expected volatility, expected dividend yield, and other assumptions.

(7) **Recognition of profits and losses from construction contract project**

When the outcome of a construction contract can be reliably estimated, the contract revenue and costs associated with the construction contract should be recognized as income and expenses at the end of the reporting period using the percentage of completion method. Transactions can be reliably estimated only when all of the following criteria is met:

- A. The amount of income can be reliably measured.
- B. It is probably that the economic benefits associated with the transaction will flow into the Group.
- C. The cost and the project completion percentage can be reliably estimated at the end of the reporting period.
- D. The costs attributable to the contract can be clearly identified and reliably measured.

Most of the construction contracts entered by the Group are fixed in contract prices. However, depending on customer's request, change in scope and prices may be required. Any changes in project scope or prices will affect the determination of the revenue, contract

cost attribution, and the estimated cost expected to complete, including changes in software, equipment, testing and labor costs, and estimates of total number of workweeks calculated based on the percentage of completion. All these factors will affect the Group's recognition of the profit or loss of a construction contract project.

(8) Changed The Useful Life of Depreciation Assets

The Company's buildings are structured with a steel-reinforced concrete construction. After considering the main structure and actual usage of the buildings, the buildings were assessed to have a longer than expected useful life. Therefore, to be in compliance with the consumption of the future economic benefits of the buildings, the Company has re-considered the estimated useful life of these buildings. In response to the buildings' current status and future economic benefits, the Board of Directors resolved to change the useful life from 20 years to 50 years on December 30, 2015, which was effective in 2016. The change of the estimated useful life decreased depreciation expenses by NT\$3,622 thousand in 2016, with the effect of changes in estimates accounted for on a prospective basis.

6. DETAILS OF SIGNIFICANT ACCOUNTS

(1) Cash and Cash Equivalents

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Cash	\$905	\$850
Checking accounts	53	53
Demand deposits	296,821	197,687
Foreign currency demand deposits	54,844	46,027
Cash equivalents	358,024	237,604
Total	<u>\$710,647</u>	<u>\$482,221</u>

Cash equivalents, for the purpose of meeting short-term cash commitments, consist of highly liquid time deposits and short-term investments that are readily convertible to known amounts of cash that are subject to an insignificant risk of changes in value.

(2) Financial Assets at Fair Value through Profit or Loss-Current

<u>Held for Trading Financial Assets</u>	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Beneficiary certificates	\$226,727	\$135,675
Publicly traded stocks	4,240	-
	<u>\$230,967</u>	<u>\$135,675</u>

(3) Debt Investments with No Active Market

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
--	--------------------------	--------------------------

Time deposits	<u>\$196,066</u>	<u>\$533,600</u>
---------------	------------------	------------------

Time deposits represent deposits with maturities more than three months.

(4) Accounts Receivables and Long-term Accounts Receivables

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Accounts receivable-current	\$225,968	\$313,390
Less : Allowance for doubtful receivables	-	(985)
Accounts receivable, net	<u>\$225,968</u>	<u>\$312,405</u>
Accounts receivable-related parties	\$-	\$25,681
Less : Allowance for doubtful receivables	-	-
Accounts receivable-related parties, net	<u>\$-</u>	<u>\$25,681</u>
	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Long-term accounts receivable	\$28,215	\$18,559
Less : Allowance for doubtful receivables	(18,559)	(18,559)
Long-term accounts receivable, net	<u>\$9,656</u>	<u>\$-</u>

In principle, the payment term granted to customers is normally 60 days from the invoice date. The allowance for bad debts is assessed by reference to the collectability of receivables, taking into account of account aging analysis, historical collection experience and current financial condition of customers.

Except for the impaired balances, for the rest of accounts receivable, the account aging analysis at the end of the reporting period is summarized in the following table. Accounts receivables include amounts that are past due but for which the no allowance for doubtful receivables is recognized. As of the date of balance sheets, the Group does not hold any collateral for accounts receivables.

Aging analysis of accounts receivable

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Neither past due nor impaired	\$125,173	\$242,903
Past due but not impaired		
within 30 days	704	-
31-90 days	2,313	211
91-180 days	2,040	18,088
over 181 days	105,394	76,884
Total	<u>\$235,624</u>	<u>\$338,086</u>

Movements of the allowance for doubtful receivables

	<u>2017</u>	<u>2016</u>
Balance at January 1	(\$19,544)	(\$19,544)
Amount written off during the year	85	-
Balance transfer to revenue during the year	900	-
Balance at December 31	<u>(\$18,559)</u>	<u>(\$19,544)</u>

(5) Construction Receipts Receivable (Payable)

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Aggregate costs incurred plus recognized profits	\$1,466,281	\$1,001,179
Less : Progress billings	<u>(1,119,801)</u>	<u>(727,504)</u>
Net balance sheet position for construction in progress	<u>\$346,480</u>	<u>\$273,675</u>

Presented as:

Construction Receipts Receivable	\$440,021	\$279,410
Construction Receipts Payable	<u>(93,541)</u>	<u>(5,735)</u>
	<u>\$346,480</u>	<u>\$273,675</u>

(6) **Inventories**

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Raw materials	\$260	\$618
Supplies	59,392	36,815
Work in process	13,626	12,749
Finished goods	2,558	7,673
Merchandise	2,470	3,415
Simulator ride materials	110,809	89,073
Less : Allowance for losses	-	-
Total	<u>\$189,115</u>	<u>\$150,343</u>

(7) **Held-to-maturity Financial Assets-noncurrent**

<u>Held-to-maturity financial assets</u>	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Non-publicly traded stocks -		
Preferred shares	<u>\$35,570</u>	<u>\$33,900</u>

Preferred shares are financial assets with fixed or determinable payments and fixed maturity dates, and that the Group has the positive intent and ability to hold to maturity. Preferred shares held are classified as Held-to-maturity Investment.

(8) **Financial Assets Carried at Cost-noncurrent**

<u>Financial Assets Carried At Cost</u>	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Non-publicly traded equity		
instruments	<u>\$17,856</u>	<u>\$25,356</u>

Equity instruments are not traded in an active markets, and the Group cannot obtain sufficient information about the industry and the relevant financial information of the investee company. Therefore, it is not possible to reasonably and reliably measure the fair value of equity instruments that are classified as Financial Assets Carried At Cost.

Because the equity instruments of Jump Media Co., Ltd. have gone listed on Taiwan emerging stock market since April 7, 2017, the Group has reclassified the above investments from financial assets carried at cost - noncurrent to financial assets at fair value through profit or loss-current during the period.

(9) **Investments Accounted for Using Equity Method**

There is no material joint venture and associate of the Group. The carrying amount of the Group's interests in all individually immaterial associates and related share of the operating results are summarized below :

Name of Associate	Principal Activities	Place of Incorporation and Operation	Carrying Amount		% of Ownership and Voting Rights Held by the Group	
			December 31, 2017	December 31, 2016	December 31, 2017	December 31, 2016
Brogent Japan Entertainment Corporation	Development and sales of simulator rides and related peripheral products in Japan	August 2016 Tokyo, Japan	\$8,061	\$6,640	40%	50%

	2017	2016
Net Income (Loss)	(\$1,238)	(\$270)
Other comprehensive income (loss) for the year, net of income tax	\$81	(\$632)
Total Comprehensive Income (Loss) For The Year	(\$1,157)	(\$902)

- A. As of December 31, 2017, the company has reclassified equipment under installation and construction in progress from prepayment for the amount of NT\$114,470 thousand. In January 2017, the equipment has arrived at the warehouse and passed the inspection for acceptance. In the first quarter of 2017, the internal management has decided to transfer the materials for self-use after assembly test.
- B. Research and Testing Center - Phase 2 that the Company invested in Kaohsiung Software Technology Park was completed and ready for intended use in March 2016. Related costs have been reclassified to buildings during the period accordingly.
- C. In January, 2016, Brogent Mechanical Inc., a subsidiary of the Company, has purchased land and plant amounting to NT\$168,000 thousand.
- D. The significant components of the Group's buildings include main plants, electricity, decoration, plumbing and drainage, extinguishing protection and air conditioning equipment. The related depreciation for Group's building components is calculated using the estimated useful lives of 50 years, 20 years, 10 years, 10 years and 8 years, respectively.
- E. Part of the land owns by Brogent Mechanical Inc. which locates in Zhongshan Rd., Xinwu Dist., Taoyuan City is used solely for farming purpose. In accordance with the regulations, the farmland is owned and registered in the name of an individual. However, Brogent Mechanical Inc. has obtained the agreement of the counterparty that at any time as the request of Brogent Mechanical Inc., the counterparty shall change the registration of the land to Brogent Mechanical Inc. or other person designated by Brogent Mechanical Inc.,

without any consideration. As of December 31, 2017, the farmland amounting to NT\$2,202 thousand was mainly used for plants, was accounted for 1.6% of the total land areas of the Group.

F. The amount of capitalized interest for the years ended December 31, 2017 and 2016 was NT\$0 thousand and NT\$1,274 thousand, respectively.

G. Please refer to Note 8 for details note disclosure for topics of pledged property, plant and equipment.

The Company has entered into a construction contract for indoor playground equipment of a theme park. As stated in the contract, the Company has agreed to exchange the simulation entertainment equipment for the right to share profits generated from sales of the theme park tickets (“profit sharing right”). The cost of profit sharing right was measured at the carrying amount of the simulation entertainment equipment given up.

Since February 2016, profit sharing right was amortized on an average basis over simulation entertainment equipment’s estimated useful life of 10 years. Refer to Note 6(22) for the details note disclosure on profit sharing right, and Notes 9(4) and 9(5) for details note disclosure in relation to the related contract commitments.

The Group's land and buildings were used as first-priority mortgage collateral is securing the loans. Details are summarized in Note 8.

(16) Pensions

	<u>2017</u>	<u>2016</u>
Defined benefit pension costs	\$319	\$410
Defined contribution pensions	7,714	7,598
Total	<u>\$8,033</u>	<u>\$8,008</u>

A. The Company has a defined benefit plan under the Labor Standards Law that provides benefits based on an employee's length of service and average monthly salary for the six-month period prior to retirement. The Company makes monthly contributions to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Before the end of each year, the Company assesses the balance in the Funds. If the amount of the balance in the Funds is insufficient to pay-off retirement benefits for employees who conform to retirement requirements in the next year, the Company is required to fund the difference in one appropriation that should be made before the end of March of the next year. The Funds are operated and managed by the government's designated authorities; as such, the Company does not have any right to intervene in the investments of the Funds. As of December 31, 2017 and 2016, the Company's pension account balance was NT\$1,487 thousand and NT\$1,236 thousand, respectively.

B. Reconciliation on the present value of defined benefit obligation and the fair value of plan assets were as follows:

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Present value of defined benefit obligation	\$9,331	\$8,416

Fair value of plan assets	(1,496)	(1,244)
Accrued pension liabilities	\$7,835	\$7,172

C. Movements in net defined benefit liability (asset) were as follows:

	Present Value of the Defined Benefit Obligation	Fair Value of the Plan Assets	Net Defined Benefit Liability(Asset)
Balance at January 1, 2017	\$8,416	(\$1,244)	\$7,172
Service cost	196	-	196
Net interest expense (income)	147	(23)	124
Recognized in profit or loss	343	(23)	320
Remeasurement			
Actuarial loss (gain) of return on plan assets	-	11	11
Actuarial loss (gain) from changes in financial assumptions	332	-	332
Actuarial loss (gain) from experience adjustments	240	-	240
Recognized in other comprehensive income	572	11	583
Contributions by the Company	-	(240)	(240)
Balance at December 31, 2017	\$9,331	(\$1,496)	\$7,835
Balance at January 1, 2016	\$8,576	(\$1,000)	\$7,576
Service cost	276	-	276
Net interest expense (income)	154	(20)	134
Recognized in profit or loss	430	(20)	410
Remeasurement			
Actuarial loss (gain) of return on plan assets	-	13	13
Actuarial loss (gain) from changes in financial assumptions	65	-	65
Actuarial loss (gain) from experience adjustments	(655)	-	(655)
Recognized in other comprehensive income	(590)	13	(577)
Contributions by the Company	-	(237)	(237)
Balance at December 31, 2016	\$8,416	(\$1,244)	\$7,172

Through the defined benefit plans under the Labor Standards Law, the Company is exposed to the following risks:

(1) Investment risk: The pension funds are invested in equity and debt securities, bank

deposits, and etc. The investment is conducted at the discretion of the government's designated authorities or under the mandated management. However, under the Labor Standards Law, the rate of return on assets shall not be less than the average interest rate on a two-year time deposit published by the local banks; the government is responsible for any shortfall in the event that the rate of return is less than the required rate of return.

- (2) Interest risk: A decrease in the government bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the debt investments of the plan assets.
- (3) Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the present value of the defined benefit obligation.

D. Actuarial assumptions:

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Discount rate	1.50%	1.75%
Future salary increase rate	2.00%	2.00%

In scenario where a reasonable fluctuation in each of the significant actuarial assumptions occur, considering all other assumptions remain constant, the present value of the defined benefit obligation would increase (decrease) as follows:

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Discount rate		
0.25% increase	<u>(\$332)</u>	<u>(\$318)</u>
0.25% decrease	<u>\$346</u>	<u>\$331</u>
Future salary increase rate		
1% increase	<u>\$1,452</u>	<u>\$1,401</u>
1% decrease	<u>(\$1,255)</u>	<u>(\$1,199)</u>

The sensitivity analysis presented above may not be a representative of the actual change in the present value of the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another and the assumptions may be correlated.

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
The expected contributions to the plan for the next year	<u>\$240</u>	<u>\$240</u>
The average duration	17 years	18 years

E. The new pension plan under the Labor Pension Act which became effective on July 1, 2005, is deemed a defined contribution plan. The employees with R.O.C. nationality can choose to continue to use the Labor Standards Law's pension regulations, or be subject to the pension mechanism under the Labor Pension Act, and their seniority prior to the enforcement of this Act shall be maintained. The Company and its domestic subsidiaries have made monthly contributions equal to 6% of each employee's monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. For defined contribution plan, payments to the benefit plan are recognized as an expense.

(17) Capital Stock

	<u>December 31, 2017</u>	<u>December 31, 2016</u>
Authorized capital	<u>\$500,000</u>	<u>\$500,000</u>
Issued capital	<u>\$446,780</u>	<u>\$446,780</u>

As of December 31, 2017, the authorized shares were 50,000 thousand shares, including 2,000 thousand shares reserved for employee stock options. A holder of issued shares with par value of NT\$10 per share is entitled to vote and to receive dividends. The issued and paid shares were 44,678 thousand shares as of the date of the consolidated financial statements

In order to gather strategic investors, the issuance of 6,000 thousand shares at a premium of NT\$240 per share by private placement had been resolved at the interim shareholders' meeting on December 19, 2014. To fulfill the needs of future operation and enhancing the working capital, the issuance of not more than 3,300 thousand shares by private placement had been resolved at the general shareholders' meeting on June 11, 2014. The privately placed shares may be issued in one or several installments (not more than two times) within one year after the resolution of the shareholders' meeting. The shareholders' meeting authorized the Board of Directors with full power and authority to handle private placement related matters. The record date determined by the resolution of the Board of Directors was June 4, 2015, with 1,030 thousand shares being issued by private placement at a premium of NT\$308 per share, and the aforementioned issuance of new shares had already been registered. As of the date of the consolidated financial statements, 7,030 thousand shares are issued by private placement. All of the rights and obligations for the privately placed shares are consistent with those for the issued common shares of the Company. However, except for being transferred to a transferee meeting the requirement under Article 43-8 of the Securities and Exchange Act, the privately placed shares cannot be sold within three years after delivery of shares.

(18) Additional Paid-in Capital

Under the R.O.C. Company Law, except for covering accumulated deficit or issuing new shares or cash to shareholders, the capital reserve shall not be used for any other purpose. Unless the legal reserve is insufficient, the capital reserve should not be used to cover accumulated deficit.

The capital reserve arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to issue new shares or cash to shareholders by the special resolution of the shareholders' meeting, provided that the Company has no accumulated deficit. Further, the amount of capital reserve to be capitalized mentioned above should not exceed 10% of the paid-in capital each year.

(19) Retained Earnings and Dividend Policy

A.If there are net profits of each fiscal year, the Company shall set aside 5% to15% of the profits as employees' compensations and no more than 2% as directors' and supervisors' remuneration; however, the Company shall first offset the accumulated deficits, if any. The employees' compensations referred above are able be paid in stocks or cash, and the employees include the employees of affiliated companies, who are qualified for certain conditions set by Board of Directors.

When allocating the net profits for each fiscal year, the Company shall first pay all taxes, offset its losses in previous years, and set aside a legal capital reserve at 10% of the profits left over, until the accumulated legal capital reserve has equaled the total capital of the Company. The remainder together with undistributed earnings accrued from prior years ("Accumulated Distributable Earnings") shall be set aside or reverse special capital reserve in accordance with relevant laws or regulations, or reserve for specific business purpose. And the remaining is distributed as dividends and the appropriation proposed by the Board of Directors and to be approved by the shareholders' meeting.

As the Company operates in a volatile business environment and is in the stable growth stage, the residual dividend policy is adopted taking into consideration the Company's operation expansion, working capital and long-term financial planning. The Company measures future capital needs through future capital budgeting, then use retained earnings to fund its capital needs. The remainder will be distributed by way of cash dividend or stock dividend, and the cash dividend shall not be less than 10% of total dividends.

B.Under the R.O.C. Company Law, the Company shall not pay dividends or bonuses when there is no profit. Except for covering accumulated deficit or issuing new shares or cash to shareholders, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.

C.Pursuant to existing regulations, the Company is required to set aside additional special capital reserve equivalent to the net debit balance of the other components of stockholders' equity. For the subsequent decrease in the deduction amount to stockholders' equity, any special reserve appropriated may be reversed to the extent that the net debit balance reverses.

D.The appropriations of earnings for 2016 had been resolved at the shareholders' meeting on May 31, 2017. The appropriations were as follows:

2016

	Amount	Dividends Per Share (NT\$)
Legal reserve	\$10,135	
Cash dividends	110,610	\$2.50
Total	<u>\$120,745</u>	

E. The appropriations of earnings for 2017 had been approved in the meeting of the Board of Directors held on March 12, 2018 and are to be presented for approval in the shareholders' meeting. The appropriations were as follows:

	2017	
	Amount	Dividends Per Share (NT\$)
Legal reserve	\$26,567	
Special reserve	4,049	
Reserve special reserve	(751)	
Cash dividends	176,976	\$4.00
Stock dividend	88,488	2.00
Total	<u>\$295,329</u>	

(20) Treasury Stock

In order to retain and recruit talents, motivate employees and enhance their centripetal force, the Company has repurchased 1,000 thousand shares at the price of NT\$249.5 to NT\$283 per share during the period from July 23 to September 1, 2015 for the total amount of NT\$266,072 thousand. As of December 31, 2017, the Company had 44,244 thousand shares outstanding.

No treasury shares transactions were occurred for the years ended December 31, 2017.

The appropriations of treasury stocks transferred to employees had been approved in the meeting of the Board of Directors on January 27, 2016.

A. The details of employee stock options referred above were as follows:

Type of agreement	Grant date	Granted numbers (thousand shares)	Vesting conditions
Treasury stocks transferred to employees	2016.1.27	566	Vested

B. The details of the share-based payments referred above were as follows:

Stock options	2016	
	Numbers (thousand shares)	Weighted-average price (NT\$)
Issued options at January 1	-	\$-
Stock options granted in current period	566	266.07
Options exercised in current period	(566)	266.07
Issued options at December 31	-	
Options exercisable at December 31	-	

C. The fair value of stock options referred above was estimated at the granted date using Black-Scholes Model. The relevant information was as follows :

Type of Agreement	Grant Date	Stock Price	Exercise Price	Volatility	Expected life (year)	Risk-free Interest Rate	Fair Value Per Option
Treasury stocks transferred to employees	2016.1.27	268	266.07	46.21%	0.1151	0.21%	\$17.70

D. The Company recognized the compensation costs amounting to NT\$10,018 thousand at the grant date.

E. The expense incurred by the transaction of share-based payment in equity was NT\$452 thousand.

(21) Share-based Payment

A. Brogent Global Inc.

(1) As of 31 December, 2017, Brogent Global Inc. has issued the following employee share options:

Items	Grant Date	Units	Option lifetime	Exercise price
2017 Employee stock option	2017.02.20	500	2017.02.20~ 2027.02.20	NT \$10

(2) Brogent Global Inc. recognized its employee share options as an operating expense; with related additional paid-in capital amounting to NT\$310 thousand due to the above issued employee stock option.

(3) Brogent Global Inc. estimated the fair value of employee stock option using Binomial Option Pricing Model with the follows assumptions:

	<u>2017 Employee share option plan</u>
Dividend ratio	-%
Expected volatility	38.06%
Risk-free interest rate	1.1214%
Expected life	10 years
Fair value at grant date	NT\$ 1.82

B. Brogent Mechanical Inc.

- (1) As of 31 December, 2017, Brogent Mechanical Inc. has issued the following employee share option:

Items	Grant Date	Units	Option lifetime	Exercise price
2016 Employee stock option	2016.11.10	250	2016.11.10~ 2026.11.10	NT \$10

- (2) Due to the above issued employee stock option, Brogent Mechanical Inc. has recognized its employee share options as an operating expense, with related additional paid-in capital amounting for the ended December 31, 2017 and 2016 at NT\$194 and NT\$27 thousand, respectively.

- (3) Brogent Mechanical Inc. estimated the fair value of employee stock option using Binomial Option Pricing Model with the follows assumptions:

	<u>2016 Employee share option plan</u>
Dividend ratio	-%
Expected volatility	38.17%
Risk-free interest rate	1.0692%
Expected life	10 years
Fair value at grant date	NT\$ 1.97

(22) Net Revenue

Items	2017	2016
Construction contract revenue	\$1,436,045	\$818,109
Mobile phone software revenue	-	57
Royalty revenue	-	25,308
Service and maintenance revenue	56,074	17,043
Sales revenue	3,889	6,837
Profit sharing of ticket sales	18,461	14,316
Total	<u>\$1,514,469</u>	<u>\$881,670</u>

(23) Other Gains and Losses

2017	2016
------	------

Loss on financial assets at fair value through profit or loss	(\$2,400)	(\$515)
Net currency exchange gain	(46,404)	(6,841)
Gain on disposal of investment	-	2,405
Loss on disposal of property, plant and equipment	(44)	-
Other gains	36,445	23,789
Other losses	(508)	(177)
Total	<u>(\$12,911)</u>	<u>\$18,661</u>

(24) Additional Information of Expenses by Nature

Items	2017		
	Cost of Revenue	Operating Expenses	Total
Employee benefit expense			
Salaries and wages	\$31,681	\$170,890	\$202,571
Labor/Health insurance expenses	3,312	11,249	14,561
Pension costs	1,762	6,271	8,033
Other employee benefit expenses	1,827	7,879	9,706
Total	<u>\$38,582</u>	<u>\$196,289</u>	<u>\$234,871</u>
Depreciation expense	<u>\$7,017</u>	<u>\$39,709</u>	<u>\$46,726</u>
Amortization expense	<u>\$23,744</u>	<u>\$11,969</u>	<u>\$35,713</u>
Items	2016		
	Cost of Revenue	Operating Expenses	Total
Employee benefit expense			
Salaries and wages	\$34,427	\$145,699	\$180,126
Labor/Health insurance expenses	2,782	10,578	13,360
Pension costs	2,068	5,940	8,008
Other employee benefit expenses	1,941	8,697	10,638
Total	<u>\$41,218</u>	<u>\$170,914</u>	<u>\$212,132</u>
Depreciation expense	<u>\$4,831</u>	<u>\$31,868</u>	<u>\$36,699</u>
Amortization expense	<u>\$20,812</u>	<u>\$10,404</u>	<u>\$31,216</u>

As of December 31, 2017 and 2016, the number of the Company's employees was 217 and 242, respectively. The headcount is consistent with the calculation basis of employee benefit expense recognized above.

The accrued amounts of employees' compensation and directors' and supervisors' remuneration for 2017 and 2016 based on income before employees' compensation and directors' and supervisors' were estimated by a pre-determined ratio. The board of directors

has decided to issue compensation of employees and remuneration of directors and supervisors amounting to NT\$28,115 thousand and NT\$5,907 on March 12, 2018, and NT\$13,647 thousand and NT\$2,729 thousand on March 14, 2017, for year ended December 31, 2017 and 2016, respectively. There is no material difference between the aforesaid amounts to be allocated and the amount has been respectively recognized as expenses in the year incurred.

The accrued amounts of employees' compensation and directors' and supervisors' remuneration were recognized as expenses. If the actual distribution amounts that are subsequently resolved by the shareholders' meeting differ from the accrued amounts, the differences should be recognized in profit or loss in next year. The information about the appropriations of employees' compensation and directors' and supervisors' remuneration as proposed by the Board of Directors and resolved by the shareholders' meeting will be posted in the "Market Observation Post System" at the website of Taiwan Stock Exchange.

(25) Income Tax

A. Income tax expense recognized in profit or loss consisted of the following:

	<u>2017</u>	<u>2016</u>
Current tax:		
Current tax on profits for the period	\$52,975	\$28,497
Additional income tax on unappropriated earnings	49	4
Current adjustments on prior years tax estimation	<u>(1,186)</u>	<u>(1,064)</u>
Total current tax	<u>51,838</u>	<u>27,437</u>
Deferred tax:		
The origination and reversal of temporary differences	4,544	(3,980)
Loss carryforwards	<u>-</u>	<u>15</u>
Total deferred tax	<u>4,544</u>	<u>(3,965)</u>
Income tax expense	<u>\$56,382</u>	<u>\$23,472</u>

A reconciliation of income before income tax and income tax expense recognized in profit or loss was as follows:

<u>2017</u>	<u>2016</u>
-------------	-------------

Income before income tax	<u>\$327,563</u>	<u>\$129,584</u>
Income tax expense at the statutory rate (17%)	\$62,202	\$21,588
Tax-exempt income and non- exempt expense in taxable purposes		
Tax-exempt income	(1,342)	-
Non- exempt expense	300	114
Movement of unrecognized temporary differences	(320)	515
Unrecognized loss carryforwards	141	3,616
The origination and reversal of temporary differences	-	(1,676)
Changes in. accounting estimates of realizability of deferred income tax assets	-	360
Loss carryforwards	(3,462)	15
Income tax adjustments on prior years	(1,186)	(1,064)
Additional income tax on unappropriated earnings	<u>49</u>	<u>4</u>
Income tax expense recognized in profit or loss	<u>\$56,382</u>	<u>\$23,472</u>

According to the Income Tax Act revised in January 2018, income tax ratio for profit-seeking enterprise has been adjusted from 17% to 20%; the change will be effective from 2018. In addition, additional income tax ratio on unappropriated earnings has been adjusted from 10% to 5%. It is expected that the change in the tax rate would have increased (or decreased) the deferred income tax assets and the deferred income tax liabilities for the years ended December 31, 2017 by NT\$1,128 thousand and NT\$0, respectively.

B. Income tax expense recognized in other comprehensive income:

	<u>2017</u>	<u>2016</u>
Deferred income tax expense (benefit)		
Remeasurement of defined benefit plans	(\$99)	\$99
Exchange differences arising on translation of foreign operations	<u>329</u>	<u>(469)</u>
	<u>\$230</u>	<u>(\$371)</u>

C. Changes in deferred income tax assets or liabilities due to temporary differences and loss carryforwards:

	2017				
	January 1,2017	Recognize in profit or loss	Recognize in other comprehensive profit or loss	Foreign exchange adjustments	December 31,2017

Deferred income tax assets	<u>\$1,177</u>	<u>\$3,965</u>	<u>\$371</u>	<u>\$-</u>	<u>\$5,513</u>

D. Unrecognized deductible temporary difference amount of deferred income tax assets:

	December 31,2017	December 31,2016
Deductible temporary difference from investment using the	\$4,197	\$21,886

equity method		
Other deductible temporary difference	14,174	15,975
	<u>\$18,371</u>	<u>\$37,861</u>

E. Unused loss carryforwards as follow:

In Taiwan area:

December 31,2017			
Year Incurred	Audited/Declared amount	Unused Creditable Amount	Usable Until Year
2017	Estimated amount	<u>\$830</u>	2027

December 31,2016			
Year Incurred	Audited/Declared amount	Unused Creditable Amount	Usable Until Year
2015	Audited amount	\$2,115	2025
2016	Declared amount	18,246	2026
		<u>\$20,361</u>	

F. Unrecognized deductible temporary difference amount of deferred income tax liabilities:

	December 31,2017	December 31,2016
Taxable temporary difference from investment using the equity method	<u>\$52,997</u>	<u>\$-</u>

G. Integrated income tax information of the Company:

	December 31, 2017	December 31, 2016
Balance of the Imputation Credit Account	<u>\$14,692</u>	<u>\$31,854</u>
	2017(Expected)	2016(Actual)
Tax creditable ratio of earnings distribution	<u>15.73%</u>	<u>24.79%</u>

According to the Income Tax Act, the creditable ratio for individual shareholders residing in the Republic of China is half of the original creditable ratio. However, according to the Income Tax Act revised in January 2018, the part of the Integrated Income Tax System will be repealed on January 1, 2018. There will no longer be any imputation tax credit.

H. The Company's income tax returns through 2015 have been assessed and approved by the Tax Authority.

(26) **Earnings per Share**

	2017	2016
Basic earnings per share	<u>\$6.00</u>	<u>\$2.30</u>
Diluted earnings per share	<u>\$6.00</u>	<u>\$2.30</u>

Earnings per share is computed as follows:

	Amount (In Thousands)	Number of Shares (In Thousands)	Earnings Per Share (NT\$)
<u>2017</u>			
Basic earnings per share			
Net income attributable to common shareholders of the parent	\$265,670	44,244	<u>\$6.00</u>
Effect of dilutive potential common shares	-	-	
Diluted earnings per share			
Net income attributable to common shareholders of the parent (including effect of dilutive potential common shares)	<u>\$265,670</u>	<u>44,244</u>	<u>\$6.00</u>
<u>2016</u>			
Basic earnings per share			
Net income attributable to common shareholders of the parent	\$101,354	44,142	<u>\$2.30</u>
Effect of dilutive potential common shares	-	-	
Diluted earnings per share			
Net income attributable to common shareholders of the parent (including effect of dilutive potential common shares)	<u>\$101,354</u>	<u>44,142</u>	<u>\$2.30</u>

7. RELATED PARTY TRANSACTIONS

In preparing the consolidated financial statements, the transaction amounts and balances between the Company and its subsidiaries (the Company's related parties) had been eliminated and were not disclosed in this Note. The significant transactions between the Group and other related parties were as follows:

(1) Related party name and categories:

<u>Related Party Name</u>	<u>Related Party Categories</u>
Brogent Japan Entertainment Joint-Stock Corporation	Joint venture
KODANSHA TAIWAN MEDIA GROUP CO., LTD.	Associates
KODANSHA LTD.	Associates
SUNNY ENTERPRISES CO., LTD.	Associates
MUSE COMMUNICATION CO., LTD.	Associates

(2) Significant transactions with related parties

A. Revenues

Type of Related Parties	2017	2016
Entities with significant influence over the subsidiary	\$-	\$25,445

B. Purchases

Type of Related Parties	2017	2016
Entities with significant influence over the subsidiary	\$-	\$4,456

C. Receivables from related parties

Financial Statement Items	Type of Related Parties	December 31, 2017	December 31, 2016
Accounts receivable-related parties	Entities with significant influence over the subsidiary	\$-	\$25,681

D. Acquisition of other assets

Type of Related Parties	2017	2016
Entities with significant influence over the subsidiary	\$-	\$316

E. Other related parties transactions

Financial Statement Items	Type of Related Parties	2017	2016
Other revenue	Entities with significant influence over the subsidiary	\$144	\$120
Manufacturing expenses	Entities with significant influence over the subsidiary	\$-	\$1,964
Administrative expenses	Entities with significant influence over the subsidiary	\$-	\$565

The sales prices and payment terms between the Group and its related parties are not significantly different from those of the non-related parties. For other related party transactions without similar classification, prices and terms are determined independently in accordance with terms mutually agreed by both parties.

(3) Key management compensation was as follows:

	2017	2016
Short-term employee benefits	\$19,274	\$15,867
Post-employment benefits	535	410
Total	\$19,809	\$16,277

8、PLEDGED ASSETS

Pledged Assets	December 31, 2017	December 31, 2016	Purpose
Other financial assets-current (Pledged time deposits)	\$34,825	\$133,620	Construction performance guarantee and warranty
Other financial assets-noncurrent (Pledged time deposits)	15,000	15,000	Lease development guarantee
Other financial assets-current (Restricted assets-reserve account)	6,158	-	Construction performance guarantee
Land	139,868	139,868	Long-term loans
Buildings	433,379	449,848	Long-term loans
Total book value	\$629,230	\$738,336	

9. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNIZED CONTRACT COMMITMENTS

- (1) As of December 31, 2017 and 2016, the Group had outstanding notes payable for the purpose of construction performance guarantee and warranty amounting to NT\$15,468 thousand.
- (2) As of December 31, 2017 and 2016, the Group had outstanding refundable deposits for the purpose of construction performance guarantee and warranty amounting to NT\$66,519 thousand and NT\$182,826 thousand, respectively.
- (3) Significant Operating Lease Arrangements

In order to raise up the technical level, corporate image, and focus on research and development resources in response to future continual growth, the Company has increased its capacity to achieve the goal of sustainable management. The Company leased 1.85 hectares of land from the Kaohsiung Software Technology Park to establish the Operations Research and Development Center on February 29, 2012. The lease has a period of 20 years, beginning from March 14, 2012 to March 13, 2032, and the lease agreements can be renewed upon

expiration. As of December 31, 2017, the Company had pledged time deposits for the purpose of lease development guarantee amounting to NT\$15,000 thousand. The lease payments recognized in 2017 and 2016 were NT\$8,805 thousand and NT\$7,424 thousand, respectively.

Notified by Kaohsiung City Government, the monthly lease fee for land has been adjusted from NT\$ 50 to NT\$ 68.75 per square meter starting on February 1, 2016. However, in order to improve the investment in Export Processing Zone, to create high-quality industrial environment and to reduce the impact from the increase of assessed present value of the land announced in 2016, the Zone Administration has introduced a lease fee relief program for the period from January 1 to December 31, 2017. Accordingly, the monthly lease fee of land has been adjusted from NT\$ 68.75 to NT\$ 53.76 per square meter.

The future aggregated minimum lease payments are as follows:

Years Range on the Lease	December 31, 2017	December 31, 2016
Within 1 year	\$12,211	\$9,068
Over 1 year and not later than 5 years	60,441	57,388
Later than 5 years	140,455	155,719
Total	\$213,107	\$222,175

- (4) The Company has entered into a construction contract for indoor playground equipment of the theme park amounting to NT\$375,000 thousand in July 2014. The buyer shall made an initial payment of NT\$150,000 thousand for construction work incurred by the Company ; with the remaining NT\$225,000 thousand to be paid off from proceeds from the profit sharing of ticket sales. Upon completion of full payments of \$375,000, the buyer is obligated to continue to share the profit generated from ticket sales.
- (5) The Company has entered into a copyright contract including franchise fees amounting to 6,250 thousand yen and guaranteed royalties amounting to 48,000 thousand yen, with the seller in October 2014. The Company shall continue to remitting royalties payments based on the contract provision even through the guaranteed royalties are insufficient during the copyright period.

Total	<u>\$528,074</u>	<u>\$613,174</u>

B. Financial risk management objectives

The Group manages its exposure to market risk (including foreign currency risk, interest rate risk and price risk), credit risk and liquidity risk with the objective to reduce the potentially adverse effects the market uncertainties may have on its financial performance.

The plans for material treasury activities are reviewed by the Board of Directors in accordance with procedures required by relevant regulations and internal controls. During the implementation of such plans, the Group must comply with certain treasury procedures that provide guides for overall financial risk management and segregation of duties.

C. Market risk

The Group is exposed to the market risks arising from changes in foreign exchange rates and interest rates.

(a) Foreign currency risk

Majority of the Group's operating activities are denominated in foreign currencies. Consequently, the Group is exposed to foreign currency risk.

The Group's sensitivity analysis to foreign currency risk is mainly focused on the foreign currency monetary items at the end of the reporting period. Assuming an unfavorable (or favorable) 10% movement in the levels of the United States dollar against the New Taiwan dollar, the net income for the years ended December 31, 2017 and 2016 would have decreased (or increased) by NT\$210,139 thousand and NT\$126,016 thousand, respectively. Assuming an unfavorable (or favorable) 10% movement in the levels of the Canadian dollar against the New Taiwan dollar, the net income for the years ended December 31, 2017 and 2016 would have decreased (or increased) by NT\$3,065 thousand and NT\$1,200 thousand, respectively. Assuming an unfavorable (or favorable) 10% movement in the levels of the Euro against the New Taiwan dollar, the net income for the years ended December 31, 2017 and 2016 would have decreased (or increased) by NT\$7,103 thousand and NT\$3,193 thousand, respectively. Assuming an unfavorable (or favorable) 10% movement in the levels of the Chinese Yuan against the New Taiwan dollar, the net income for the years ended December 31, 2017 and 2016 would have decreased (or increased) by NT\$54,100 thousand and NT\$9,347 thousand, respectively.

(b) Interest rate risk

Interest rate risk refers to the risk that the fair value of financial instruments will change as a result of changes in market interest rates. The Group is exposed to interest rate risk arising from fixed-income investments and fixed-rate loans.

The Group's sensitivity analysis to interest rate risk is mainly focused on changes in interest rates of fixed-income investments and fixed-rate loans at the end of the reporting period. Assuming an increase (or decrease) in interest rates of 10 basis point (0.1%), the net income for the years ended December 31, 2017 and 2016 would have decreased (or increased) by NT\$119 thousand and NT\$160 thousand, respectively.

(c) Other price risk

The Group is exposed to price risk arising from financial assets and liabilities at fair value through profit or loss.

The Group's sensitivity analysis to price risk is mainly focused on changes in fair value at the end of the reporting period. Assuming an increase (or decrease) of 7% in prices of financial instruments, the net income for the years ended December 31, 2017 and 2016 would have increased (or decreased) by NT\$16,168 thousand and NT\$9,497 thousand, respectively.

D. Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group is exposed to credit risk from operating activities, primarily accounts receivables, and from financing activities, primarily bank deposits, fixed-income investments and other financial instruments. Credit risk is managed separately for business related and financial related exposures.

(a) Business related credit risk

The Group has set the procedures for business related credit risk to maintain the quality of accounts receivable. The Group assesses the credit quality of the customers by taking into account their financial position, the credit rating agencies' rating, the Group's internal credit rating, historical trading records, current economic situation and other factors. The Group also uses some credit enhancement instruments such as prepayment for purchases and credit insurance to reduce certain customers' credit risk.

As of December 31, 2017 and 2016, the Group's top three largest customers accounted for 69.91% and 71.64% of accounts receivable, respectively. The Group believes the concentration of credit risk is insignificant for the remaining accounts receivable.

(b) Financial credit risk

The Group monitors and reviews credit risk of bank deposits, fixed-income investments and other financial instruments. The counterparties are banks with good credit quality, financial institutions with investment grade or above, corporations and government agencies, so there is no significant compliance concerns and credit risk.

E. Liquidity risk management

The objective of liquidity risk management is to ensure the Group has sufficient cash and cash equivalents, highly liquid securities and adequate bank lines to maintain financial flexibility.

The table below summarizes the maturity profile of the Group's financial liabilities based on contractual undiscounted payments, including principal and interest.

	Less than 1 year	2-3 years	4-5 years	Over 5 years	Total
<u>December 31, 2017</u>					
Accounts and notes payables	\$50,923	\$-	-	-	\$50,923
Other payables	96,101	-	-	-	96,101
Long-term bank loans	45,090	88,973	54,391	237,960	426,414
Total	<u>\$192,114</u>	<u>\$88,973</u>	<u>\$54,391</u>	<u>\$237,960</u>	<u>\$573,438</u>

	Less than 1 year	2-3 years	4-5 years	Over 5 years	Total
<u>December 31, 2016</u>					
Short-term bank loans	\$20,000	\$-	\$-	\$-	\$20,000
Accounts and notes payables	164,491	-	-	-	164,491
Other payables	77,786	-	-	-	77,786
Long-term bank loans	47,847	55,434	54,814	263,279	421,374
Total	\$310,124	\$55,434	\$54,814	\$263,279	\$683,651

F. Fair value of financial instruments

(a) Fair value of financial instruments carried at amortized cost

The Group considers that the carrying amounts of financial assets and financial liabilities carried at amortized cost in the consolidated financial statements approximate to their fair values.

(b) Valuation techniques and assumptions used in fair value measurement are as follows:

- I. The fair values of cash and cash equivalents, accounts receivable, other financial assets-current, short-term loans and accounts payable are approximately equal to the carry amounts due to their short maturity.
- II. The fair values of financial assets and financial liabilities with standard terms and trading in active liquid markets are determined with reference to quoted market prices (includes publicly traded stocks and beneficiary certificates).
- III. The fair values of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

(c) Fair value measurements recognized in the consolidated balance sheets

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- I. Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- II. Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- III. Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data

(unobservable inputs).

Financial assets and liabilities measured at fair value on a recurring basis

Financial instruments that are measured subsequent to initial recognition at fair value are primarily publicly traded stocks and beneficiary certificates that their fair value measurements are those derived from quoted prices in active markets for identical assets.

The following table presents the Group's financial assets and liabilities measured at fair value on a recurring basis:

	December 31, 2017			
	Level 1	Level 2	Level 3	Total
<u>Financial Assets at</u>				
<u>Fair Value Through</u>				
<u>Profit or Loss</u>				
Beneficiary				
certificates	\$226,727	\$-	\$-	\$226,727
Publicly traded stocks	4,240	-	-	4,240
	<u>\$230,967</u>	<u>\$-</u>	<u>\$-</u>	<u>\$230,967</u>
	December 31, 2016			
	Level 1	Level 2	Level 3	Total
<u>Financial Assets at</u>				
<u>Fair Value Through</u>				
<u>Profit or Loss</u>				
Beneficiary				
certificates	\$135,675	\$-	\$-	\$135,675

There were no transfers between Level 1 and Level 2 of the fair value hierarchy or assets and liabilities held as of December 31, 2017 and 2016 that are measured at fair value on a recurring basis

There were no purchases and disposals for assets on Level 3 for the years ended December 31, 2017 and 2016, respectively.

(2) **Capital Risk Management**

The Group's objective of capital management is to maintain robust credit rating and good capital ratio to support business operations and maximize shareholders' interests. In order to maintain and adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares.

- (1) Directly invest in a company in Mainland China.
- (2) Through investing in an existing company in the third area (Brogent Hong Kong Limited), which then invested in the investee in Mainland China.
- (3) Others.

Note 2 : Amount was recognized based on the audited financial statements.

14. OPERATING SEGMENTS INFORMATION

(1) Operating Segments

The Group's revenues are principally from the research, development, design, production and sales of the media-based attraction (MBA). The Group upholds the concept of sustainable development, and achieve the objective of making profits for the shareholders in the coming years. The Group executes the operating strategy of double C by taking a two-pronged approach ("channel" and "content") to transform into the cooperators of the entertainment industry from a supplier of amusement park facilities. In the meantime, the Group implements the diversification strategy, the profit sharing model, and the integration of the one-time outright sale of equipment to expand the sites of global sales and optimize the product content and value.

The Group's operating decision maker reviews the Groups' overall operating results to make decisions about resource allocation and assess the Groups' overall performance. Therefore, the Group has a single operating segment.

(2) Geographic Information

	Revenue		Noncurrent Assets	
	2017	2016	December 31, 2017	December 31, 2016
Taiwan	\$25,815	\$107,566	\$957,128	\$956,412
Asia	1,209,646	389,411	-	-
Europe	115,568	356,336	114,470	-
United States	152,023	28,357	-	-
Australia	11,417	-	-	-
Total	<u>\$1,514,469</u>	<u>\$881,670</u>	<u>\$1,071,598</u>	<u>\$956,412</u>
