

Brogent Technologies Inc. Environmental Policy

Article 1 Based on climate change and the impact that humans have had on earth, the company should implement corporate green responsibilities and pay attention to the rights and interests of all stakeholders. Further, the company should incorporate a corporate sustainable management strategy into corporate management and operational behavior.

Article 2 Brogent's mission is “bringing people the future by creating fun and fulfilling their dreams” and aspires to be the global leader in the immersive simulation equipment industry. Based on this corporate culture, Brogent strives to “Total Shareholder Return (TSR)” and to fulfill its “Corporate Social Responsibility (CSR)”.

Brogent should strive to implement environmental protection related management and actively invest in energy-saving policies, and provide corresponding resources to achieve the following commitments:

1. Brogent is mainly engaged in the development of digital content and the sales and operation of simulator rides, among which the simulator rides are outsourced. Therefore, we comply with the regulations and requirements of the government's environmental protection and energy laws and regulations. At the same time, we actively conduct sustainable development education and training for relevant personnel, and enhance the common understanding of sustainable development among subsidiaries, suppliers and third parties.
2. Actively implement green procurement to reduce or diminish the impact of the company on the environment due to its operational derivative activities.
3. Continuously implement energy-saving and carbon-reduction management, use centralized air-conditioning control system, replace the LED tube and construction of solar power generation systems to effectively reduce power consumption year by year. All office buildings adopt rainwater recycling system to reuse water resources. Prioritize electric or hybrid cars for company vehicles to reduce gasoline consumption. Do a good job in waste classification management and improve the reuse rate of goods, strengthen indoor greening, increase natural ventilation, and improve indoor air quality to promote sustainable development of the environment.
4. The product adopts standardized and modular design to increase the replacement rate of components of the same type of product, and reduce product wear and tear in the R&D or manufacturing stage, so as to reduce the amount of raw materials used.

Article 3 Based on global warming and extreme weather conditions, which directly or indirectly affects the global economic environment, industrial structure and sustainable business operations. In response to the efforts of various industries to prevent climate risks from affecting economic development, various energy-saving and carbon-reduction actions have been strengthened. Brogent should uphold its corporate social responsibility and strive to promote environmental protection activities, and incorporate them into the focus of corporate governance, as the standard of the company's sustainable operation.
